Look to this day, for it is life.
The very life of life.
In its brief course lies all the realities
and verities of existence;
The bliss of growth,
The splendor of action,
The glory of power—

For yesterday is but a dream, and tomorrow
is only a vision.
But today, well lived, makes every yesterday
a dream of happiness and every tomorrow a
vision of hope.
Look well, therefore, to this day.

_Sanskrit Proverb_

DR. HARVEY STIFFLER
YEARBOOK ADVISOR

DEDICATION

TO EACH MEMBER OF THE GRADUATING CLASS OF 1971,
CONGRATULATIONS!

You have reached the summit. Although this particular summit
merely climaxes what has been a scaling of numerous didactic peaks,
its conquest represents, more than the attainment of a new height.
It represents, and perhaps of greater significance, a higher level of
maturity, freedom, and responsibility. Life, as each of us individually
views it, is a progression of valleys and peaks. As we are able more
maturely to pass through the valleys of our being, the more meaning­
ful and beautiful do the peaks become. And as we slowly mature—
and slowly it is, for maturation is priced experience, paid only with
the coins of time—the less deep do the valleys become and the easier
is the ascent of each peak beyond until the path on which we traveling,
slowly becomes one of level, high ground.

The self-awarded freedom which results from self-imposed matura­
tion brings with it the price of individual responsibility, for even free­
dom has its price. As you become more and more responsible to your
own true self, the more nearly attuned you become to the responsibil­
ity you have to those you serve; your patients, your colleagues, super­
iors, families, community, country, and the God you understand.

And so it is with no small amount of pleasure, on behalf of all of
us who have had the opportunity of assisting you in the attainment of
the pinnacle of your academic goal, I extend to each of you our con­
gratulations on the occasion of this achievement.

_HARVEY J. STIFFLER, Ph.D._
Chairman, Basic Sciences Division
DR. B. C. EGERTER
CHAIRMAN, BOARD OF TRUSTEES
Man's foot "is the most distinctive human part of the whole of his anatomical make-up" (F. Wood Jones) enabling him to stand and walk erect. This posture distinguishes him from God's other creatures. It freed his hands to work and develop skills, and gave his eyes greater vistas for wide ranging experiences leading to his highly developed brain. Reduce or eliminate this ability to stand erect and walk about, and you undermine his status as a human being.

The foot is not only a part of the body, the individual is a member of his family and community. The psychological effects of a foot problem may be more significant than the physio-pathological.

Podiatry is more than foot care. It is concerned with more than the medical implications of poor foot health. Good podiatry can provide a boost to the psyche, and it makes important socio-economic contributions.

We deliver you to your chosen professional world, confident that you will be "good podiatrists." And we anticipate leadership in service to your patients and their families, your profession and your community.

This appears to be the age of gaps. We have the generation gap, the missile gap and, I feel, a gap between the students' education and the active role of the professional podiatrist in the office practice. It is, therefore, a specific function of the internship to act as a bridge for this gap and smooth the way to a successful and fulfilling podiatry practice.

EXTERN AND INTERNSHIPS AT WADSWORTH VA CENTER

The Veterans Administration Center, Wadsworth, Kansas, which is affiliated with the Ohio College of Podiatric Medicine, and in co-operation with the College, offers a 12-month Rotating Podiatry Internship and a 3-month Podiatry Externship yearly.

The total bed capacity of the Center is approximately 1,450 patients, and consists of a general hospital, neuropsychiatric hospital, nursing home care unit, and a domiciliary.

The three interns who are selected jointly by O.C.P.M. and the Wadsworth VA, spend four months each at this institution, rotating simultaneously through general podiatry, general and podiatric surgery. The extern spends one month each on general medicine, general surgery, and in the Podiatry Clinic.

The program is directed by Dr. James A. Crawford, Chief, Podiatry Section, with Dr. Donald A. Mahrle of Topeka, Kansas, as teaching Podiatry Consultant.
EXTERN PROGRAM AT CLEVELAND STATE HOSPITAL

The Podiatry Department has played an active part on the Cleveland State Hospital Staff for over a period of twenty years. It was founded through the co-operation of the superintendent of the hospital and the Ohio College of Podiatric Medicine.

Its supervision is under the direction of graduate Podiatrist, Dr. John N. Kane. The staff also consists of Drs. Carl C. Sosinski, John M. Warrix, James C. MacVeigh, and Carl J. DiFranco.

The Department has at its disposal all the facilities of a modern hospital. This enables the staff to offer a more complete and comprehensive teaching program. For the last three years, the staff has also included one full-time intern. It offers to the fourth-year students ample opportunities for participation in hospital protocol, surgical observations, and over-all hospital functions.

This program enables the student to increase his perspective, appreciate Podiatry as a unit of the medical department, and understand at the same time some of the therapeutics and rehabilitation of patients, both from the physical and psychiatric standpoints.

John N. Kane, D.S.C.
Director, Department of Podiatry

IN-SERVICE TRAINING AT HAWTHORNDEN STATE HOSPITAL

Hawthornden State Hospital is an institution for mental patients located at the northernmost tip of Summit County near Northfield, Ohio. Its Podiatry Department was established in 1950, and in-service podiatry training in 1966.

Dr. Stephen Rehak heads the Department of Podiatry and Dr. James A. Conforti is the consultant in podiatric medicine. Two cooperative programs have been established with this Hospital. Interns rotate through the Hospital on a monthly basis and third-year students are assigned over a two-week period for in-service training on an externship basis.

Hawthornden offers exposure to a great variety of foot pathologies, permitting third-year students to improve their diagnostic abilities and treatment skills. Students and interns become familiar with hospital protocols, records, and with the management of psychiatric patients, as well as improving their basic skills in podiatric medicine.

Dr. I. J. Tolan, Superintendent, has been an enthusiastic supporter of these clinical programs, and the Ohio College of Podiatric Medicine is indebted to him for his cooperation.
EXTER PROGRAM AT HIGHLAND VIEW HOSPITAL

Highland View Hospital, a modern and progressive Cuyahoga County institution, is unique in that it is one of the few institutions in the United States wherein specific steps have been taken to provide a realistic program for the care, treatment and rehabilitation of persons with disability, and long-term illness. The restoration of the patient to maximal independence is the basic objective of therapy.

The hospital is a 600 bed institution located in the southeastern suburban area of Cleveland and epitomizes the concept of "total medical care team work." All the medical specialties, including podiatry, are represented at Highland View, except pediatrics and obstetrics.

Besides the podiatry extern program, Highland View Hospital is affiliated with the Western Reserve University Schools of Medicine and Dentistry, and is dedicated to and conducts extensive research and teaching programs.

This unusual institution serves the young as well as the aged who are afflicted with traumatic disabilities, locomotor system impairment due to neurological disease, malignancies and chronic degenerative disease.

The extern program for the seniors of the Ohio College of Podiatric Medicine was initiated in 1956 under the direction and supervision of Dr. Henry S. Dennis, Chief of the Department of Podiatry at Highland View and Past President of the Ohio Podiatry Association. This program is designed to aid future podiatrists toward an improved understanding of hospital procedure, protocol, recording, charting, terminology, scope of practice, organizational methodology and many other aspects of institutional podiatry practice and clinical experience.

STUDENT COUNCIL

It is with great pride that I enumerate the achievements of the Student Council of 1970-71. This body truly effected a revolution in the role of the student in podiatric education. Developing from the seed planted November 3, 1969, the Council of '70-'71 influenced progressive alterations in student, faculty, and administrative policy and protocol at our College.

Early in 1970 the Student Council was expanded to include the representation of each student organization. Meetings were moved to evening hours and supplemented with fine lectures. This Council also sought representations on the Boards of the Alumni Association and the Ohio Podiatry Association. Thirteen students were seated on the Faculty-Student Forum including five with full voting power. Student Council not only formulated a new constitution, but also formulated a student handbook, renovated the student lounge, and sponsored the most successful theater party in its history.

Special mention is due my Executive Committee who gave this Council the strength and unity which enabled it to accomplish so much in so little time.

James V. Vitale
President
Pi Delta Honor Society is a national organization honoring podiatry students for scholastic achievement. Each of the five podiatry colleges has a representative chapter. At the Ohio College of Podiatric Medicine, the previously existing Zaccharian Honor Society has become the Beta chapter of Pi Delta.

It is the objective of Pi Delta to "promote high scholarship in podiatry and the podiatric sciences in order to progressively advance the profession." For an individual to become eligible for membership, he must have completed two years of scholastic work, have a grade average of at least ninety percent, and be in the top twenty percent of his class. A research paper of podiatric interest suitable for publication must be submitted and approved to obtain membership status.

Throughout the year the members of the Beta chapter exemplify the scholar's interests in deriving more than the average from the educational process by featuring dinner-lecture meetings.

With the knowledge and abilities acquired in this Society, the members are well equipped to make their places in podiatry. These are men who should never lose their desire for hard work, the continuing search for knowledge, and a total betterment of their profession.

Elliott J. Kramer
President, Beta Chapter
AMERICAN PODIATRY STUDENTS ASSOCIATION

The students of Podiatry stand today with their futures in front of them. We must have a hand in shaping our future both scholastically and professionally. We must master the current problems facing us, not only as students but as future practicing Podiatrists. As students we should try to express our views to practitioners, the American Podiatry Association, and the colleges throughout the country, as we strive to become an influential body in the advancement of Podiatry. Since we are the future leaders of the profession, we should dedicate ourselves, our time, and our efforts to help the profession in any way we can. The American Podiatry Students Association is the instrument in which we students can have a voice in our professional advancement.

Our accomplishments are many and have increased throughout the years. We can begin with the semiannual meeting of students from each of the five schools, the one forum for an exchange of interschool ideas. At these meetings we have compiled student programs such as the Preceptorship and Internship Program. We have recently developed a Student Visitation Program. We must also consider our draft deferment which we fought so diligently to obtain. These programs benefit the student in helping to further his professional career.

The A.P.S.A. is an all-encompassing organization striving for podiatric advancement both scientifically and politically. We take an interest in every aspect of Podiatry and continually look for better ways to provide for the individual student.

I would like to extend my sincere thanks to my Executive Board and to the delegates of each class for their help in making this a very successful year for the American Podiatry Students Association.

Gary S. Kaplan, President
A.P.S.A., Ohio Chapter
The Interfraternity Council is the governing body of the fraternity system at the Ohio College of Podiatric Medicine. The Council is comprised of five representatives from each fraternity, including each organization's president. The Council serves as a liaison between the fraternity and the administration, while promoting lasting friendships among the fraternities.

I wish to express gratitude to my brothers for the cooperation achieved this year.

Daryl Saferstein
President
ALPHA GAMMA KAPPA

As President of Alpha Gamma Kappa Podiatric Fraternity, I take great pride in its major role in this institution. The purpose of this Kappa Chapter is to promote friendship and welfare among the students and practitioners of Podiatry. Fraternalism is AGK's greatest asset and each member must realize that he makes the fraternity and without his participation the fraternity does not function.

Included in AGK's extracurricular scientific program is the Eastern Star Nursing Home Program which enables the AGK underclassmen to receive pre-clinical experience in Podiatric Medicine. Another realm of the fraternity program has been our demonstration techniques on injections, strapping, suturing, and casting. AGK has proudly sponsored the Cleveland Clinic Lecture Series which includes some of the foremost doctors in their respective fields.

It will be a difficult challenge over the coming months to exceed in quality AGK's social functions especially in view of the past year's events that included the Ox Roast, Halloween Costume Party, Christmas Party, Valentine Party and of course AGK's most magnificent occasion, the Formal Dinner Dance honoring friends and brothers of Alpha Gamma Kappa.

I would like to thank this year's Executive Council which has done its utmost to uphold the traditions of the fraternity. And, to the brothers of the Senior Class, may I extend my sincere wishes for a successful and meaningful future in our professional careers as Doctors of Podiatric Medicine.

Frederick L. Conti
President

Kappa Tau Epsilon Scientific Fraternity has always been an organization of exceptional insight, designed at its inception to fill whatever voids existed in the education and professional development of its brothers. Therefore as the scope and concept of podiatric medicine increases each year, our fraternity will always be there to enlarge our present programs and initiate new ones, dedicated to the best interests of our brothers and of our profession.

Before this year ends, we expect to have a new, enlarged clinic at the Cleveland House of Correction, thus updating the program there in accordance with modern podiatry and our own enlarged numbers. When this is completed we will have improved facilities for all aspects of podiatry, and our clinic will be second to none.

Besides our bimonthly home demonstrations and our monthly open lecture series, we have started a Sunday morning breakfast lecture series.

Our school education program which we began in 1969 has gone through another most successful year. This, we believe, is a proper "first" in educating the lay public to podiatry, as well as our brothers the opportunity to develop a talent for speaking to groups.

It is appropriate at this time that we thank Dr. Michael Kates for his many efforts and infectious enthusiasm which he has demonstrated to us in his many years as our advisor.

It is my pleasure formally to announce that Dr. Marvin Arnold is our new fraternity advisor.

To my fellow graduates the best of luck next year, and in the years to come; to the remaining brothers of KTE, we wish you more and bigger programs in your efforts toward professional maturity.

Sheldon Freelan
President
Reflecting upon Phi's long history of prominence among Podiatric Fraternities, a Latin phrase comes to mind. *Abeunt studia in mores* means, "Practices zealously pursued pass into habit."

Since Phi Alpha Pi was founded in 1919 it has zealously practiced excellence; practiced it until it has become a habit.

Phi offers a well balanced program which includes an outstanding lecture series, numerous clinical demonstrations, and an opportunity for its members to treat patients at our various fraternity-operated clinics, such as the Salvation Army Center and Franciscan Convent location.

To be content with the past glories and accomplishments does not become any organization. Phi is constantly looking for better ways to benefit its members and be of service to the profession. The future challenges us all and this fraternity stands ready to meet the challenge. I am proud to be a member of such a group.

Let me take this opportunity to express gratitude to my Executive Board, without which this administration could not function. To my Vice-President, Charles Young; Treasurer, Gary Wasiak; Recording Secretary, Barry Schecter; Corresponding Secretary, Ronald Kaplansky; and Sargeant-at-Arms, Gary Kaplan, thanks for a job well done. Special thanks is due Dr. Rocco Palermo and Dr. Michael Forman who so generously give of their time and knowledge. To our Grand Archon, Dr. Edward Schwartzfeld, and to Dr. Alan Silver thanks and best wishes.

ALUMNI ASSOCIATION

The officers and members of the Alumni Association of the Ohio College of Podiatric Medicine welcome to the profession the members of the graduating Class of 1971. We also welcome each member of this Class into the Alumni Association.

Your Alumni Association is dedicated to the betterment of your College and through support of all Alumni, we will one day witness the expansion we all want and need.

During the past two years, I have served as President of the Alumni Association with the help of our active and interested Executive Committee. We have seen changes within the College, the new Clinic, the closed circuit T.V. and the new curriculum. We are progressing and every year brings new and better advancements.

We wish you a happy and prosperous life in the fields of Podiatry.

You and Armour serve a common cause: better care for each patient, better health care for the nation. As a Doctor of Podiatric Medicine, you take care of patients, directly. We help, indirectly, in many ways. We're in this together.

It is not just that we make some of the medications which you find valuable in treating your patients... for instance: Biozyme® (Neomycin Palmitate—Trypsin-Chymotrypsin Concentrate Ointment), Chymoral®-100 (Enzyme Tablets), and Nicobid™ (niacin, Armour) timed release nicotinic acid. We also try to do our share in aiding the advancement of podiatry by providing services which may be helpful to you personally, and to your colleagues. For example, the American Podiatry Association has joined with us to conduct professional research projects designed to provide up-to-date information on the practice of podiatric medicine.

Our Awards Program is designed to promote excellence of communication in podiatry. Each year, Armour provides a $500 award for the best paper on lesions of the foot appearing in your Association journal; and another $500 award for the best paper on any subject presented at the annual meeting of the APA.

Then there is our Information Program which:

a) publishes a periodical, the Clinical Review of Dermatology and Orthopedics of the Lower Limbs;

b) makes available to you certain reprints from the scientific literature;

c) commissions the writing of special Review articles on various disease categories to serve as postgraduate refresher materials; and

d) circulates important information on various drug products.

The fact is that we're vitally interested in the future of podiatry, and also in the future of each new graduate doctor. If you will let us know when and where you are planning to go into practice, we'll see if we can be of service to you right from the start.
