The do's and don'ts of parking (cars)

Many students at Kent State Stark Regional Campus seem to be rather vague about the parking regulations. In order to clear the confusion, the Security Office has released the rules which are to be followed by students and visitors.

1. Parking decals, which are obtained at registration and are also available at the Security Office, are to be displayed in the proper place, (the lower right hand corner, on the passenger's side.)
2. Students must park properly in the student parking lot.
3. No student vehicles are permitted in the visitor's parking lot.
4. No student vehicles are permitted in the faculty-staff lots, anytime during the day or night.
5. Motorcycles must park in the spaces designated for their use. No other vehicles are permitted in this area.
6. If an unregistered vehicle is parked on the campus, a temporary decal must be obtained from the security office.
7. If a student's car breaks down and he must drive another car, which does not have a decal, he should notify the Security Office so he will not be ticketed, and also pick up a temporary parking permit.

Students are reminded that they are not permitted to park in the lot near the tennis courts. Too, parking is prohibited in the spaces in back of the Health and Physical Education Building.

If students have any questions about any of the rules, they should contact the Security Office which is located on the first floor next to the elevator.

Relevancy: the main issue!

More important than the question, "What are the Experimental Programs?" is the question, "What do they do?" The Experimental Programs are trying to meet the demand of many students, relevancy. This, the main goal, is done by setting up classes in areas which concern everyone.

The topics include: War and Peace, Racism and Poverty, Natural and Social Ecologies, Problems and Possibilities of Education for the Future, Focus on Women's Studies, and Individualism, Dissent, and Communication. Gerald A. Figurski, the co-ordinator for the Experimental Programs, feels these are topics which affect every student.

The idea of the Experimental Program originated with Mike Lunie, dean of the Honors and Experimental College of Kent State University, and Dr. Zaynor, associate dean. The program, which is being used at Michigan University, was put together for use here at KSUSRC.

Faculty members volunteer to teach the classes, and choose a topic of their choice. Teachers serve mainly as a co-ordinator of activities, and assist the students when they ask for help. The program benefits the faculty members by helping them learn new teaching methods. Faculty members might find the new way of classroom teaching more effective and use the new methods in their other classes.

Students learn independence by setting up the class themselves. They decide what will be accomplished in the course, what books will be read, where the classes will meet, and if attendance should be taken. The students decide if they want to do individual projects or plan panel discussions.

Each program consists of 17 students. They are selected on a first come-first served basis at registration. Only one may be taken per quarter. The class is an automatic pass-fail course, and the three hour credit is outside the 48 hours of pass-fail allowed per year. An "F" is non-punitive, and doesn't affect the students' grade point average. The course can go toward a student's major, (for example, Problems and Possibilities of Education for the Future would be a good course for education majors.)

Students requesting information concerning the Program may see Gerald A. Figurski in room 418.

Dr. Curtis Ramsey, Chairman of the Dept. of Elementary Education, will meet with elementary education majors on Thursday, January 27, 1972 from 1:00 to 2:30 p.m. in Lecture Room 100. Dr. Ramsey will discuss and answer questions pertinent to the elementary education curriculum. All elementary education majors should plan to attend sometime during the hours scheduled. Counselors are also invited.

Richard Kemphorn, general chairman for the AAU National Women's and Girls Track Finals, named Robert D. Kistler and Dale A. Wearstler to positions.

Kistler has been named chairman for the Meet Activities, and Wearstler will be Facilities Director.

Among other things, Kistler will direct all meet activities, schedule the events, and handle eligibility and meet regulations to conform with AAU and Olympic standards. Too, he is expected to appoint a director of registration within a few days.

Wearstler will coordinate all facilities including locker rooms, warm-up space, the track itself, seating and all other on-location needs for contestants, their coaches, the officials, and the spectators.

After the announcements, chairman Kempthorn went on to stress the importance of total community effort which is necessary to make the major sports event a success.

STUDENTS INTERESTED IN PARTICIPATING IN STUDENT GOVERNMENT! Please stop in room 218 to discuss your interest; there will be vacancies throughout the year.
‘Who cares’ attitude, is it here to stay?

OPINION

A lot has been said this year and last year about student apathy. With the problem came many different types of “solutions”.

Various organizations tried to put some of these “solutions” to work. Students began to notice posters hanging in the halls announcing when a club was having a meeting.

However, this “solution” did not bring about much results. Students began to complain that organizations were not giving them enough notice in advance.

In turn, posters were hung trying to give students advance notice. Still not many students showed for meetings.

The point is that many of the organizations have gone out of their way trying to get students interested in doing something. However, their attempts have failed. The majority of the student body just doesn’t care what goes on. They’re content with just letting a “small clique have the run of the school.”

Do they bother to do anything about it? No they continue to sit in the lounge and play euchre, cracking jokes about Frank Road High.

These are those people who don’t have time to attend meetings because they work (or some other excuse).

It’s one vicious circle.

So, in the future apathy and solutions to apathy will continue. However, the final solution lies within each student.

Are you ready to get involved?

Cobras play alone

OPINION

Yes, Virginia, there is a Cobra basketball team. To judge by attendance, however, you would think the players were playing for their own benefit. The only cheering at many games comes from the cheerleaders, who make up the complete audience.

Not very inspiring, is it?

Basketball teams perform much better if they know they’re being backed. If the Cobra team judged its value to the school by the number of students who attended the games, the whole team would have superiority complexes.

Even though the team might be told constantly, “We’re behind you 100%,” that 100% it’s still more encouraging in the stands, actually cheering.

Don’t sit there and say you back the team. Get out to one of the games and show them.

Pres. Olds to visit students

OPEN LETTER TO STUDENTS

Dear Students,

On December 16, 1971, Zelda Cohen, James Fry, Michael Panasiti, and I attended a meeting with Dr. Glenn Olds, President of Kent State University. We presented the petition you signed regarding our problem with the current abatement and transient policy of the university.

Dr. Olds was sympathetic to the problems we have encountered as a Regional Campus of Kent State University and promised to call a meeting of the students and faculty of the Stark Regional Campus to review the total policy on abatements and transients.

It is important that we as students show an interest in revising the present policy. Dr. Olds is planning to visit the Stark Regional Campus on Friday, February 4, 1972. To show our support for his endeavors, please plan to attend the meeting in Room 100 on that Friday. The time will be announced in advance.

Sincerely,

Frank Cicchinelli
Student Body President

Editorial Policy

Editorials appearing in MONTAGE reflect a majority opinion of the Editorial Board. The Editorial Board reserves the right to edit, condense or reject all matter submitted for publication consideration and holds the author solely responsible for its content. Letters to the editor should not exceed 200 words in length and must be signed. Names will be withheld on request.
Have you ever contemplated what a letter from Martha Washington, the first First Lady of our country, was like? Read on, for I have reprinted a letter from Martha to my great-great-grandmother, Doris Franklin Adams.

Mount Vernon-April 17,1775

My dear Doris,

Greetings from Virginia! How are things in the bordello business? And how is your husband Robespierre?

George bought a new '76 Famaro carriage, equipped with power reins and dual candlelight. It was indeed a nice surprise, but I imagine the insurance on it will be ridiculous! I hope to God the children don't take it out and wreck it at the drags!

Our son has joined a new "rock" group called the Martridge Family. The servants have been complaining at the noise he makes rehearsing what supposedly will be their first hit:

Imaginings slated for Cobra Road

by Angela Mary Uliveto

Plans to eliminate the hazards of Cobra Road are on the drawing board, according to Dale Warstler, head of Business Affairs. During an interview, Warstler answered some of the questions raised by the students who use the road.

Why does the road contain a hairpin turn and a dangerous exit?

This is the way the architects planned the road, but the school hopes to eliminate the hairpin turn eventually by straightening the road and possibly changing the entrance.

As for the exit, the contractors did not remove enough of the embankment. However, the university tried to alleviate the situation by removing a portion of the hill.

Why didn't they just repave the old road?

According to the master plan, Cobra Road was to run north of the Cedar Chest Theater. However, it was discovered that the land could not be used because it was a bog and swamp area. Tractors and bulldozers ran into difficulty when trying to grade the land.

How much did it cost to put in the new road?

Because the road is an add alternate of the Health and Physical Education Building, the exact cost of the road itself has not been determined.

Besides trying to eliminate the hairpin turn and removing the embankment, will Cobra Road undergo any other improvements?

In order to make the road wider, a four foot berm will be added. Also, future plans call for the addition of sidewalks and lampposts.

Test to be given

The speech and hearing tests for quality standards in the College of Education may be taken the week of January 24 on the following schedule:

9:00-noon Monday through Friday
3:00-4:00 M-Tue-Thur-Fri.
Evenings by appointment.

All students planning to teach must meet this commitment. The 2 minute tests will be conducted in Room 411. No appointments are necessary for testing during the day.

Now the movie folks

The Student Activities Council will be sponsoring two films this weekend (January 21 and 22). "The Heart is a Lonely Hunter" will be shown Friday, and Emile de Antonio's "Millhouse" will be shown Saturday.

Admission to "The Heart is a Lonely Hunter" is 50¢ to members of the Stark Regional Campus. No admission will be charged for "Millhouse." Both showings will begin at 8:00 p.m. in Room 100.

Also SAC is requesting the use of a 16 mm movie projector for the dates given below.

Faculty members, administrators, and students are cordially invited to attend.

January 13, 1972
1-21-72 The Heart is a Lonely Hunter
1-22-72 Millhouse
1-28-72 The Learning Tree
2-3-72 Bullitt
2-10-72 Who's Afraid of Virginia Woolf
3-3-72 Up the Down Staircase
3-31-72 The Damned
4-14-72 The Sergeant
4-22-72 Bonnie & Clyde
5-5-72 Camelot
5-13-72 They Came to Rob Las Vegas
6-2-72 The Sea Gull
10-6-72 Look Back in Anger
10-22-72 Joe
11-10-72 The Illustrated Man
11-24-72 The Fox
12-2-72 The Ballad of Cable Hogue
Record shattering feat highlights Cobra win

by Rick Senften

The Kent Stark Cobras ran their record to 10-3 with a double win weekend which included a record shattering 129 point splurge against KSU Wadsworth Saturday night.

"Unselfish is the word I would use to describe their play," said coach Tom Eibel about his basket bombing cagers. "When they see a teammate open for a shot they won't hesitate at all to get the ball to him. This has been a big reason why we've had 3 or 4 guys in the double figures so often."

After pulling out an 87-68 win over KSU Astabula in which center Bob Marraccini hit for 22 points to lead the way, the Cobras headed into their record setting contest.

Hitting 58% from the field and 75%

from the charity stripe, the Cobras completely dominated their Wadsworth opponents by a 129-72 margin. Gary Jones led the Stark five with 33 points followed by Bob Sistrunk's 27. Tim Gatts and Otis Brooks had 16 and 15 markers respectively.

"Though we're not really tall, we move the ball real well," said Eibel. "Also Dave Brown is getting stronger at rebounding and that has helped us."

The only dull spot in the Wadsworth win was the ankle injury sustained by Marraccini.

"We hope Bob can be back in the lineup. He's been an asset in both the rebounding and scoring departments," Eibel commented.

HPE building being 'broken in'

Many students have been wondering why KSU Stark has a new health-physical education building that lacks basketball equipment. The reason is relatively simple: money has not been released by the state to purchase such equipment.

Stark cage belles score opening win

It's one down and seven to go for the Kent Stark women's basketball squad as it scored an opening day triumph over the Loraine Community College team Saturday at the Jewish Center.

In a see-saw struggle, the Cobras found themselves down by 6 with only 3 minutes left in the contest. Battling back, Stark knotted the score at 48 all on Sue Mani's theft and Sue Shuster's basket. A bucket by Sheila Randolph put the Cobras ahead by 2 and Dottie Meola put the lock on the game when she sunk a final-seCONDS foul shot giving the Stark five 51-48 win.

Leading scorers for the Cobras were Sheila Randolph with 16 points and Sue Mani with 11.

The team's next encounter will be tomorrow night at 6:00 against KSU Salem at Jackson High School immediately before the Cobra varsity game.

Intramural results

The first week of intramural basketball tipped off Saturday at the Jewish Community Center, with seven games played.

This year there are 18 teams in the basketball program, nine in each division with the divisions named simply A and B.

A quarter is the first team to score 12 points, so that the winning teams' final score is 48. Other prevailing rules are no fast break or full-court press, and no foul shooting.

In A division action Saturday, No Name nipped Electric Turnips 48-42, the High Balls defeated the Bulldogs 48-30, the Untouchables beat the Faculty by the same 48-30 score, and Avis Ten beat the Animals 48-42.

In B division games, Wild Blue rolled over the Panthers 48-10, Warsaw Warriors nipped the Bruins 48-42, and Our Gang had no trouble defeating the Individuals 48-28. The game between Federal Lanes and Apple Corps was rescheduled for a later date, and the inter-division game between Cicchinelli's Cheaters and Wild Bunch will be completed at a later date. The game was halted with the Cheaters ahead 22-18.
