The OCCOPODIAN

1953

The Annual of the Ohio College of Chiropody
ACKNOWLEDGMENTS

This edition of the Occopodian is the result of many hours of work on the part of the administration and student body of the Ohio College of Chiropody. The editorial staff wishes to thank Dr. Egerter, Dr. Pomerantz, and Dr. MacBane for their help in writing and editing the copy; Mrs. Silverman, Mrs. Struble and Mrs. Schlorer for the typing of the many letters and articles necessary for the completion of this book. Thanks also to Ed Dillon for his excellent photographic work and to our advertisers, for without their support this edition of the Occopodian would not have been possible.

The Editors
During the ten years which have elapsed since the last issue of the Occopodian, many changes have taken place, both in the physical aspects and spirit of our college. The modern institution which we enjoy today is the product of many years of untiring effort on the part of our predecessors.

Outstanding among those who have labored to elevate our college and profession to the position which it enjoys today, is Dr. Max Harmolin, President Emeritus of the Ohio College of Chiropody.

This man had a "dream" of founding a Chiropody College which would be "second to none" in the country. Today this "dream" is a reality.

We, who now share the "fruits" of this lifetime of work, say, "Thanks, Dr. Harmolin, for a job well done."

Allen C. Struble, Jr.
Co-Editor

F O R E W A R D
Progress is a change, and if that change is for the betterment of mankind, then it is in the right direction. Since the last edition of the Occopodian, there have been many changes in every aspect of our modern way of life. Many of these changes have resulted in turmoil throughout our civilization, but in every field of medical endeavor there has been rapid progress.

Along with the advent of the newer antibiotics, vaccines, and serums, a change in the rationale for the treatment of disease has evolved, that being the practice of the "art" of medicine, along with practice of the "science" of medicine. Today each patient's problem is given individual consideration. In a tumultuous world with much retrogression, the healing arts have progressed.

Has Chiropody, as one of the medical sciences, kept abreast of these advancements? Yes! In the past decade, no profession has made more rapid and positive strides than the profession for chiropody. At no time in our history have we enjoyed the lofty rung on the ladder of progress, than the one which we have now attained. Moreover, we do not have to look further than our college to see this progress in motion. Not only in the physical aspects of our modern clinical facilities, but also in the expansion of our didactic work, which has given us a more encompassing knowledge of the ailments of human kind. Each day the ramifications of these changes become more evident.

However, it is up to each graduate, new practitioners in this profession, to help develop these advancements and foster others. To our Classmates who are about to enter into the service of their country upon graduation, God Speed. Remember you represent the chiropody profession, many times under trying, difficult, and almost impossible circumstances. But you will be as an ambassador of our profession and will have to act accordingly.

Therefore, just as this yearbook is dedicated to progress of the school, we the graduates of 1953, dedicate ourselves to the progress of the profession of chiropody.

HAROLD V. ROTH
Co-Editor
Not within the memory of those living has there been such a period of world unrest as you have experienced during your college days. In many instances you and those supporting you have suffered severe hardships in order that you might secure preparation for your life’s work. Frequently it has been said that the world economic and social order is entering a new period in the development of civilization. Whatever the change, you may be sure that human suffering will continue to require your best thought and skill to prevent and cure it.

I congratulate the student body on the standard of scholarship for the present year. The opening of the various new departments in the clinic, the new surgery, the clinical pathological laboratory, the new roentgenology as well as physiotherapy departments have greatly improved that service and has made available for clinic teaching the finest to be found in any college.

I especially congratulate the staff of the OCCOPODIAN in publishing this year book during these difficult times. It is a permanent record of our college days during this period. Through its pages will be found the spirit which has characterized this college. It has been said that improvement is the order of the age. Moderately in every respect a light vein of history in Chiropody is scattered throughout the pages of this volume. It becomes apparent, by comparison, the progress that has occurred in our profession; deducing therefrom that the days of yesterday have constructed the foundation of the present. At the same time it adds significance to our events as they too shall be advances that have occurred in the past. Let us try to build a dream ship of memories wherein we can place those treasured incidences that occurred during the past four years. To this let us add an album of pictures which may stir to vividness a hazy outline, then let us line this vault with a thin gray mask of history and so link our events to those of the past and stretch forward to a glorious future. I congratulate all of you upon your success in accomplishing what you have started out to do. It is my wish that the graduating class shall have the success in practice which their fine record in college merits.

M. M. POMERANTZ, M.D.
Dean
The revival of the OCCOPODIAN after so long an absence is, in my opinion, indicative of the renewed spirit of progress which has been fostered and strengthened in the College during the past year. This progress has stemmed from the willingness on the parts of the administrators, faculty, and students to serve the high standards formulated by those who first founded the Ohio College of Chiropody.

I believe that the graduating class of 1953 should be congratulated for being instrumental in displaying so actively this growing concept of advancement. ALL PROGRESS IS A CHANGE—BUT ALL CHANGE IS NOT PROGRESS. An improvement in methods of class and clinical instruction, the newest and best in scientific equipment, modernistic environment, diversified extra-curricular activities—all these are useless unless they are accompanied by an enthusiastic resolve to succeed. Such determination has been exhibited admirably by the Class of ’53, and it is due to this wholehearted cooperation that the Board of Trustees and the Teaching Staff have been able to promote this change into concrete success.

In making my humble contribution as President of the College, I am grateful for the unselfish aid given to me by all individuals and departments of the School in making this goal a reality. We must not, however, be content with the mere inauguration of this new effort. Its ultimate fulfillment cannot be reached without the earnest endeavor of all.

B. C. Edgerter, D.S.C.
President
Progress is advancement in both physical aspects and mental attitude. It is the mental attitude that concerns me as Senior Class Advisor. During the past four years I have had the privilege of watching you grow into mature professional men.

The attitude of your class has been most gratifying and is a credit to the profession of Chiropody. This conscientious, sincere attitude is the foundation of success in professional life. Thus, it must be guarded and cherished in order that you may receive the respect due you as a professional man.

Become affiliated with your local and national organizations, and be an ACTIVE member. This will help you to think clearly during the difficult days of your early practice life.

As my farewell to the Class of 1953, I wish to leave you with this message. It will be to your benefit that you acquaint yourselves with the intangible forces of life to become a success. Be humble, yet positive; be sincere and honest, and give credence to the adage, "Do unto others as you would have them do unto you."

On behalf of the class of 1953, I would like to sincerely thank our Instructors, School Administrative Officials, and the Board of Trustees for their endeavors and cooperation in making our four years at Ohio College of Chiropody the most informative years of our lives.

As students we felt we deserved the best that higher education could provide, but we knew we would have to work for it. We have had our trials and tribulations, but by energetically applying ourselves we have mastered the formal training needed to take our place in a dynamic growing profession.

Now the question that presents itself is this. What role will you play in this great profession? Will it be guided by a vision—an ideal—a great aspiration? Or will it be guided by the path of least resistance?

I call your attention to a word. It is a word often used in evaluating business and professional men. It denotes a doer, a contributor, one who has made his vocation better by being in it. The word is productivity.

All that our profession is and all that it can ever be depends upon the productivity of those who are in it.

Chiropody is at a stage in its evolution which demands that we not fail.

My parting hope is for a unanimous pledge of productivity from the Class of 1953.

George A. Schlorer
Senior Class President
Students put theory into practice in the newly completed surgery, fully equipped with an amphitheatre for student observation.

The modern clinical pathology laboratory is a valuable aid in diagnosis of diseases associated with the lower extremities.

FRESHMEN

C. C. CLINIC

Progress! Webster defines it as follows: a moving or going forward: advancement: proficiency. Probably no other department at the Ohio College of Chiropody has shown such a marked journey of state as that of the clinic.

Our bright modern quarters which are equal to the finest in the country, serve as a proving ground for practical knowledge and theoretical learning. Steps are continually being made to move forward in mutual benefit to both the public and the students.

Advancement has been made in the new student rotation program wherein each senior spends five weeks of concentrated work in each of the following departments exclusive of the general chiropody department, 1. X-Ray and Diagnosis, 2. Physio-therapy, 3. Pathology Laboratory, 4. Orthopedic Laboratory, 5. Surgery.

Another mark of progress and advancement is the recent formation of the Women's Board of the Ohio College of Chiropody. This is a volunteer group comprised of Doctors and students wives who very generously donate time to assist in the clinic pharmacy and registry.

It is evident that proficiency could not be maintained without the untiring efforts of our capable clinical staff made up of two full time and 14 part time chiropodists. The clinic pathology laboratory is also staffed by a full time pathologist.

The most important function of the clinic is the culmination of all training to produce a competent and progressive chiropodist. The clinic is therefore dedicated to this ideal and must of necessity always show progress.

Donald F. Bliehall, D.S.C.
Director of Clinics
ACTIVITIES

Extra Curricular activities play an essential role in the progress of our school. Glancing over the past year, many activities have filled our college calendar of events.

On the social docket, the year got off to a fun-filled start with a Welcome Dance sponsored by the Northeast Ohio Aacademy of Chiropodists. Next, the students enjoyed a Thanksgiving Dance sponsored by the Student Council. Soon after, the Women's Board, consisting of female chiropodists and chiropodist's wives, held a card party and toy raffle to raise money to help pay for the new student lounge—a project which they backed to its completion. The very next day, the Women's Club, wives of our fellow students, held a Barn Dance which was open to the entire student body. April marked the O.C.C. Talent-Variety Show. Laughs galore were the "bill of fare" for a highly successful and enjoyable evening.

With progress as their keynote, the Student Council also made great forward strides this year. The initiation of a student activity fee by this group will make possible our year book, a monthly paper, student health plan, and various social activities. A much needed constitution was drafted that will delegate the necessary power for an efficient and effective student governing group. In no time at all, the Council sparked the student body to donate a new X-Ray development room to the Clinic.

The F.A.A.C. Convention in February was the highlight of our educational extra curricular activities. Returning to Cleveland after an eight year absence, the leading men of the chiropody profession were on hand to discuss the latest technique and newest developments in chiropody. Juniors and seniors were invited to attend the lectures and social events. Our post-graduate lecture series in March required juniors and seniors to attend and were open to men of the profession. Lecturers for the week were Dr. Glen Anderson of San Francisco, California, Dr. Ralph Dye of Sandy Lake, Pennsylvania, Dr. Felton Gamble of Tucson, Arizona, and Dr. Wienerman and Dr. Schreiber of New York City, New York.

Activity-wise, this past year has meant progress to us all. It is our extra curricular activities that will help us to develop the spirit and attitude that will carry chiropody forever forward in the future.

MORRIS B. WEISS and ALLEN C. STRUBLE, JR.
Gamma Sigma Tau is the youngest Fraternity on O.C.C.'s campus, having been installed in the 1950-51 school term by the National Chapter of Chicago. Believing in the principles of liberty, equality, and fraternalism, G.S.T. has opened its doors to all men worthy of its membership. It also sponsors annually a scholarship to an outstanding member of an undergraduate chapter.

This has been a very eventful year for G.S.T. On Nov. 16, 1952, a closed meeting was held at Crile V.A. Hospital where Dr. Charles S. Berry gave a wonderful demonstration on X-ray technique and diagnosis.

January not only brought in the new year, it also brought along two new members, James A. Cannady and Howard Fletcher. Their initiation was followed by a banquet at the Cedar Branch Y.M.C.A. Several members of the graduate chapter were present.

On Feb. 15, 1953, an open scientific lecture was given by Dr. Charles S. Berry. His topic was, "Diabetes Mellitus and Its Relation To The Lower Extremities". Following this on Feb. 23, James A. Guy, D.S.C., was the guest speaker at our annual smoker. His topic was, "Pointers on Opening a New Practice". This was a very gay affair.

During the month of March several closed scientific meetings were held in which the members engaged in a round table discussion on various topics concerning our profession. Much information was gained from these sessions.

"On to Chicago", is the slogan of all G.S.T. men. This school term is bowing out with a trip which we all plan to make to the Windy City where the annual National Convention of G.S.T. will be held on April 24, 25, and 26, in the Washington Park Y.M.C.A., 50th Street and Indiana Ave.

Inaugurated this year will be the "Annual Farewell Party" for Gamma men of the graduating class.

PRESIDENT JAMES A CRAWFORD
KAPPA TAU EPSILON

Third Row: M. Goldberg, R. Kubinski, S. Chabler, L. Silverman, C. Ciccarelli, E. Weaver, M. O'Connor, R. McClain.
Front Row: J. Allen, D. McCarthy, Chaplain; T. Zarras, Secretary; R. Shafer, Vice President; F. James, President; W. Laine, Treasurer; G. Schroers, Sergeant at Arms.
Absent from picture: C. Rubenstein.

The Alpha chapter of Kappa Tau Epsilon, an independent fraternity for the year of 1952-1953 presented an excellent program series, well planned to impart to all the student body, information that is pertinent and congruous with our chosen profession.

Our calendar of activities included Dr. F. J. Jarm, who spoke in October on "Bandaging Techniques." During November D. C. H. Verovitz M. D., well known to all our students, delivered a lecture on "Anesthesia in Chiropody." On December 10, Kappa Tau Epsilon was indeed fortunate in hearing Dr. C. A. Hubay give an excellent illustrated lecture on "The Surgical Approach to Varicose Veins". In the following month of December Dr. H. L. Hoffman M.D. surgeon, spoke on "Differential Diagnosis of Tumors in the lower Extremity".

During the spring season KTE was honored to hear men of great note come before them. Ushering in the season Dr. L. Frankel M. D. lectured on the vital subject of "Arteriosclerosis in the Diabetic Patient". The second rush meeting saw Dr. J. E. Titus speak on "Balance Therapy". Our final rush meeting was the traditional KTE Symposium of Chiropodial Techniques, an evening of applied Chiropody Techniques and Modalities.

On March 12, 1953 Dr. Felton O. Gamble of Tucson, Arizona lectured on the subject of "Chiropodical Roentgenology." As the season carried on two Scientific lectures a month, as well as student Demonstration and Symposia were held. These sessions are the keystone of our profession, founded upon sincere interest, fraternity and the attitude of "I Must Know More".

This outstanding year of lectures and demonstrations was climaxed by our Senior Farewell dinner dance which was the outstanding social event of our year.

FRANK JAMES, President
The Kappa Chapter of Alpha Gamma Kappa Fraternity, a National Chiropodical Fraternity, presented its members and guests with an excellent scientific program throughout the school year, averaging 2 scientific meetings a month.

Included in the many outstanding speakers sponsored by the Gamma's were Dr. B. C. Egerter, President of our school; Dr. M. Pomerantz, Dean of our school; Dr. D. Bliehall, head of our clinic; Dr. Witte, a leading chiropodical surgeon in Cleveland and a member of our faculty; and Dr. R. W. Zak, expert physiotherapist and clinician in the foot clinic.

Speakers brought in from out of town included Dr. H. L. Collins, from Columbus; Dr. Wayne Myers, from Lima, O.; Dr. E. C. Jones, from Toledo; and Dr. Calvin Bruce, from Huntington, W. Va.

The social program commenced with an Officer's Installation Dinner Dance held at the Richmond Country Club the first month of school.

Then followed an enjoyable time for all members and the freshmen at our Annual Rush Season "Smoker."

Our AGK National Convention was held in Chicago and 5 delegates from our chapter were present.

The first day of Spring we held a Semi-Formal Buffet Dinner Dance at the Richmond Country Club, which initiated the pledges into the social program of the fraternity.

The formal initiation of the pledges was the next event on the social calendar.

The Seniors were bid a fond farewell at the Senior-Farewell Formal Dinner-Dance, at the Richmond Country Club. An enjoyable time was experienced by all.

DICK ELLIS
**Phi Alpha Pi**

*Front Row:* L. Bleiberg, W. Fabrey, Chaplain; L. Brown, Secretary; J. Isenberg, Treasurer; A. Sabatelle, President; M. Latzanich, Vice President; E. Kappelman, Scribe; R. Bernstein, H. Roth, M. Weiss.

Phi Alpha Pi is the only Chiropodical fraternity listed in “The Collegiate Sororities and Fraternities of The United States”.

The primary aim of the fraternity is the furtherance of Chiropody as a science. One of the major endeavors of our group is to supplement our formal college work with scientific meetings in which prominent practitioners present new ideas and techniques.

This year Epsilon chapter was host to the National Convention. Scientific lectures, medical displays, and a dinner dance were the outstanding features of the day’s activities. The speakers presented were: Dr. M. Pomerantz and Dr. A. Tramer of Cleveland, Ohio, Dr. E. Kaplan and Dr. R. Jacobs of Detroit, Michigan, Dr. A. Levin of Washington, D.C., and Dr. J. Becker of Olean, N.Y.

Our big social function of the year was the Senior Farewell-Officer Installation Dinner Dance held in May.

A. SABATELLE, President

CLASS OF '53

NEW JERSEY CHIROPODISTS SOCIETY
We, the manufacturers of Reliance equipment, are proud to have served the Chiropody Profession for a generation.

Experience gained from constant research along lines suggested by the nation's leading Chiropodists has enabled us to produce equipment which offers the Practitioner those qualities which he will most value in his day to day practice.

Like any long term investment, the purchase of professional equipment deserves careful thought. Comparison is the best yardstick. In a treatment chair ease of adjustment, patient comfort, sturdy construction and eye appeal are all features which play a leading role in determining the effortlessness and efficiency with which your day's appointments can be handled.

Compare, then ask your friends who own Reliance. They are our best salesmen.

ANTIOCH SHOES
A PRODUCT OF ANTIOCH COLLEGE

Foot Specialists know that the success of their practice depends to a very considerable extent upon the quality of the shoes which their patients wear. Badly designed shoes can rapidly undo all that many hours of skillful treatment can accomplish. At the same time, ugly health shoes usually do little good, for women will not wear them consistently.

ANTIOCH SHOES are shaped like the feet. They have no gadgets or devices in them to operate against treatment or corrections which the foot specialist may prescribe. Antiochs are correct shoes, attractively styled. Write for a booklet.
