OCCOPODIAN

THE
OHIO COLLEGE OF CHIROPODY
ANNUAL
Cleveland, Ohio

FORTIETH ANNIVERSARY
1916 - 1956
ACKNOWLEDGEMENTS

The staff of the 1956 Occopodian wish to sincerely thank the following people whose efforts helped make possible this edition:
Miss Dorothy Kline and Mr. Pete Roper of the Ohio Advertising Agency.
Mr. Ted Wahl of the Little King Publishing Co.
Dr. Irwin H. Frank, former student advisor of the Ohio College of Chiropody.
Dr. Alan G. Silver present student advisor, and to the office secretaries, Mrs. Hinkle and Miss Worth.

THE STAFF

BOARD OF TRUSTEES

The Chiropodist's Oath

Upon my honor, I swear this oath:

I shall, above all, hold paramount the welfare of my patient, regardless of fee or favor. I shall neither prescribe nor administer any treatment or drug detrimental to his well being.

I shall offer to the best of my ability professional advice to all who ask, without regard for race, creed or station in life, recognizing the obligation of my profession to render public service.

I shall preserve the dignity and honor of my profession and aid my brother practitioner to the fullest extent of my abilities.

In all good faith, I shall support the properly constituted organizations of my profession. I shall abstain from doing harm to my fellow man, and shall oppose any devices and false pretensions which do injury to him and to my profession.

With this oath I accept the moral and legal responsibilities of the profession of Chiropody.

I hereby dedicate myself to serve humanity holding as my goal the relief of pain and suffering.

Before God and my fellow man, may I adhere to this oath in the practice of my art and do honor to this, my chosen profession.
The Occipodian Staff of 1956 is very proud to be a part of the 40th Anniversary Celebration of the Ohio College of Chiropody. It can be said without reservation that through the outstanding work, endeavors, and progress of the Ohio College of Chiropody, our profession has grown to be recognized as a very essential and integral branch of the medical profession.

The year 1916 stands out in the history of Chiropody in Ohio. It was in 1916 that the Platt-Ellis Bill was passed. This bill regulated the limited branches of medicine, whereby Chiropody became a recognized branch of the medical profession in Ohio. Immediately following the passage of this bill the Ohio College of Chiropody was incorporated.

Through the foresight and vision of Dr. Max S. Harmolin who surrounded himself with the following men: Cecil P. Beach, Oscar Klotzbach, Lester Siemon, Charles Spatz and Clark McConnell, Ohio College of Chiropody made its entrance as one of the leading Chiropodical educational institutions. These men served as the first board of trustees with Dr. Siemon as President and Dr. Harmolin as Secretary-Treasurer. Aretas Biddinger, M.D., became the first dean.

To "advance the profession of Chiropody, both through research and interchange of ideas, and through specialized training" was the academic goal of the founders of the college. They also wished to instill into the minds of young men and women an appreciation of the valuable services they could render mankind through the relief of foot and related ailments. Throughout the years, these basic principles have never wavered.

During the first six years of its existence, Ohio College of Chiropody was located in the Republic Building at 647 Euclid Avenue, and consisted of a lecture hall, a laboratory and 8 clinical chairs. The first class of 20 students was graduated in 1917, the duration of the course being at that time only one year, and the admission requirements, a high school certificate.

Throughout the years, the requirements have been gradually increased, and the coverage of subjects has been made more comprehensive, preparing the student, upon graduation, to meet his responsibilities with confidence and skill. In addition to the comprehensive curriculum and important clinical work, the student also learns the proper administrative procedures of establishing and maintaining a Chiropodical practice.

In September, 1929, the College moved to a new home in Playhouse Square — the fourth floor of a building located at 1620 Euclid Avenue. These facilities had class rooms for about 200 students, histological, pathological, bacteriological, and chemistry laboratories, and executive offices.

From the beginning, Dr. Max S. Harmolin kept before him the vision of someday having a building that would be a monument to the profession, and provide the finest physical appointments and teaching facilities. In 1931 plans were started for a new building to meet the demand of an increased student body and the in-
increased academic goals of a growing profession. This building, the present site of the school at 2057 Cornell Road, was formally dedicated in 1932.

Ohio College of Chiropody is ideally located in the heart of the cultural and educational center of Cleveland. It is within walking distance of many of the city's outstanding institutions such as Western Reserve University, Case Institute of Technology, the Cleveland Art Museum, the Academy of Medicine, University Hospitals, Benjamin Rose Hospital, and Severance Hall. Many of the facilities of these institutions have been made available to the students of our college.

Constant advancements made in teaching under the guidance of a faculty of over 60 prominent physicians, dentists, and chiropodists resulted in recognition by the Office of Education of the Federal Security Agency, of our college as an institution of higher learning. This placed us on a par with colleges of other professions.

In addition to the academic section of the Ohio College of Chiropody, the Cleveland Foot Clinic, housed in Harmolin Hall, plays an integral part in educating the students. The clinic has six departments with all the latest equipment and apparatus, affording the student practical experience with every variety of foot condition that could occur in the practice of Chiropody. The various departments are as follows:

A general Chiropody department gives the students an opportunity to treat patients, follow cases through, and keep adequate appointment schedules for patients.

The x-ray department, under the supervision of one of the prominent specialists in the x-ray field, is fitted with the most modern equipment to meet the student's every need in x-ray work and diagnosis.

The plaster rooms and orthopedic rooms are models in size and facilities. Here the students learn the art of making various types of casts, and fracture casting techniques.

A new surgery department comparable to the best in hospital use has been provided.

The physiotherapy department contains all the up-to-date modalities used in physical therapy, including ultrasonic therapy, diathermy, hydrotherapy, sinusoidal and galvanic therapy.

The pathology department is set up to do complete pre-operative and post-operative laboratory work and any culturing or microscopic work that is required as an aid in diagnosing.

The Ohio College of Chiropody can be proud of the high standard of education and rank which it has attained in the past 40 years. We feel confident that in the years to come, it will maintain and surpass these goals, contributing, as ever, to the advancement of the profession of Chiropody.

THE OCCOPODIAN STAFF
As we stand at this milestone in the history of the college and the profession, I cannot but reflect on the past forty years and wonder how they will compare to forty years in the future.

The past four decades have seen a tremendous broadening in the scope of practice, increasing need for service, and growing acceptance of the profession by both the lay public and the other healing professions.

Among the more recent progress is the development of research, which is badly needed to continue the growth of the profession at the present rate. Progress in research can best be accomplished by the establishment of chairs in the various departments of our college manned by individuals who are devoted and dedicated scientific scholars. Without research, we cannot hope to expand our boundaries or improve the service which our profession renders to humanity. We must not lose sight of the fact that this service to humanity is the chief facet of the profession of chiropody.

Will we be able to meet the challenge of the next forty years and continue to grow at the same rate? There is much yet to be done. The profession as a whole can accept the responsibility only if each individual is willing to assume his share of the load. We at the college have tried to prepare you to face this challenge squarely. It is up to you, the members of the Class of 1956, to see that each of you helps. It is your job to write the story of the next forty years, and with God's help, you will write it well.
ADMINISTRATION

In a recent issue of an internationally known education journal, the following quotation appeared: “To teach about something without relating that knowledge to the glorious ‘business’ of living is an educational waste of the greatest magnitude.”

You who represent the 39th graduating class of the Ohio College of Chiropody can justly feel that you are well prepared to embark upon this great adventure — “the glorious ‘business’ of living.”

Your training here at the college has included the very best not only in class and clinical instruction but also in the field of human relations. The combined efforts of the faculty and administrators have been the results of forty years’ concentrated work and experience. You have benefited from the priceless experience of men and women of unusual foresight and determination who contributed unselfishly of their time and energies to obtain for this college and the profession of Chiropody the acknowledgment it deserves.

We have made tremendous strides toward the completion of this goal during the years that have passed both in scholastic advancement and in our profession. It is now up to you to continue to pursue these aims and to further the principles and traditions established by our founders and their successors. There is still much to be done, and any future achievements depend greatly upon the way you utilize the knowledge you have gained.

I am confident that this occasion of our 40th Anniversary will mark the beginning of an even greater era of progress not only for the Ohio College of Chiropody but for the profession as well.

B. C. EGERTER, D.S.C.
President
This year our school is celebrating its Fortieth Anniversary as a teaching institution, with its prime aim being the education of the future chiropodist.

This ideal is also shared by many men who have given freely of their time and effort for the advancement of the profession of chiropody.

On behalf of the editors of the 1956 Occopodian as well as by the senior class of the college, this edition is dedicated to a man who, in the opinion of many, has graciously given his time, effort and knowledge to the students of the Ohio College of Chiropody. This man is Philip Saginor, professor of Pharmacy and Narcotics.

The course of lectures and demonstrations which Mr. Saginor has prepared have been extremely well presented, and is just a part of his method of teaching.

Many lecturers from the drug industry are introduced to the classes to give a better understanding of the latest advancements in pharmaceutical products to the students.

To Mr. Saginor goes our sincere thanks and appreciation for an outstanding and admirable job which he is doing at the Ohio College of Chiropody. We sincerely hope that the future will bring him all that he so righteously deserves.

Progress in the education of the student in chiropodical practices is very ably demonstrated in the clinic at Ohio College. The directors have kept in mind the purpose for which the clinic was founded, the correlation of didactics with practical experience. In so doing they have kept abreast of the new developments in the field of chiropody and have a working organization of which they can well be proud.

The student is assigned to different departments for a specified period. During this time he works with patients and applies the techniques which he has learned in class. He may be assigned to pathology lab, examination, physical medicine, orthopedics or be called to assist in surgery.

Progress has been the watchword, and an unceasing effort has been put forth to maintain the present high technical and ethical standards for which the college has long been noted.

Highland View Hospital, a county institution, modern and complete is unique in that it is one of the few institutions in the United States where specific steps have been taken to provide a sound program for the care, treatment, and rehabilitation of persons with long-term illness. It provides services in all the specialities including Chiropody, except Obstetrics and Pediatrics.

The hospital is a 576 bed institution located in the southeastern area of Cleveland, and is dedicated to “care, treatment and research in the field of chronic diseases.”

The Department of Chiropody, under the directorship of Dr. Henry S. Dennis, was inaugurated in March 1953. In February 1956, an extern program for the senior students of the Ohio College of Chiropody was instituted.

• O. C. C. Orchestra
The 1955-56 school year is one that the Epsilon Chapter of Phi Alpha Pi can really be proud of. One of Phi's outstanding features is their programming of exceptional scientific lectures, with such speakers as: Dr. Ralph Fowler, President of the National Association of Chiropodists; Dr. Earl G. Kaplan, Dr. Ramon Jacobs, Dr. A. L. Berndt, Dr. S. L. Robbins, Dr. H. Bronston and Dr. Harvey Haber who were present this year.

We found one of the best ways of further developing our chiropodical skills was through the monthly home demonstrations, during which time we learned various injection techniques, venous puncture, felt padding and shoe therapy.

Socially, Phi highlighted its calendar with a holiday hayride, a couples get-together, and an invitation dinner held at Settler's Tavern.

As the curtain was about to fall on the school year, our annual Senior farewell-officer installation dinner dance was held at the Manger Hotel, thus bringing to an end another year of successful scientific and social programming.

Seated, L. to R. — P. Davidson, Pres.; H. Saperstein, V. Pres.
Colors — Maroon and Gold

The Kappa chapter of AGK was organized at the Ohio College of Chiropody on November 25, 1927 by Dr. Chitwood and Dr. Dye, and invited sixteen charter members. Dr. Harmolin was the first honorary member.

Its purposes being: promotion of friendship, development of character, assistance in the gaining of a sound education, and the observance of the highest standard of ethics so that the profession of Chiropody may be advanced through the efforts of the Fraternity.

During 1955-56 thirty-one members, under the leadership of President James Snorf, added another successful year to the history of Kappa Chapter of Alpha Gamma Kappa, National Chiropodical Fraternity.
Kappa Tau Epsilon Fraternity is the independent fraternity at the Ohio College of Chiropody. This year as every year Kappa Tau Epsilon has continued in its tradition to present the finest in Scientific Lectures and Home Demonstrations.

The following lectures were presented this year:

Dr. Edwin Weaver of Youngstown, Ohio, delivered a lecture to the student body on "Modern Chiropody".

Dr. Raymond Suppon of Barberton, Ohio, lectured and demonstrated office techniques of Chiropodical Surgery.

Mr. Robert Nenad, student at Western Reserve Medical School, lectured and demonstrated the Artificial Kidney.

Dr. James Brightwell of Barberton, Ohio, presented an excellent lecture and demonstration on athletic straps and casting.

During the second half of the school year K.T.E. has planned to have lectures on New Chiropodical Drugs, Wolf's and Davis's Law and Appliance Therapy.

With this schedule Kappa Tau Epsilon Fraternity concluded the 55-56 scientific program.
This is the Zaccharian story — foreword to a new chapter in student education at the Ohio College of Chiropody.

Three years ago several students banded themselves together in work on a project which would aid the public to better understand chiropody and which could be used to teach prospective students the advantages of their attending a chiropodical college. From this fellowship a permanent organization was developed, whose sole purpose was the advancement of the profession through public relations, education and research.

At the present time the society is engaging in original research in two fields, and preparing a group discussion to be presented in a nurse education program at Cleveland Clinic.

The Zaccharian Research Society focuses attention upon an ever increasing adherence to the fundamental principles of modern education for which the Ohio College of Chiropody is justly recognized in the field of chiropody.
The function of the Student Council of the Ohio College of Chiropody is to act as a liaison between the administration and the student body. Also undertaken by the council is the annual Variety Show, Christmas Convocation, Student Directory, and the improvement of the lounge and grounds of the college.

Capably leading the council through the 1955-1956 term were:

Wally Malkin President
Cortland Stiles Vice-President
Pete Vlahos Treasurer
Edwin Jenkinson Secretary

The objectives of the interfraternity council are to promote friendship and cooperation between the fraternities of the Ohio College of Chiropody, to coordinate their activities, and act as the final governing body on fraternity issues.

The council is composed of nine voting members and six alternate members plus the president. Phi Alpha Pi, Alpha Gamma Kappa, and Kappa Tau Epsilon each have three voting members and two alternate representatives. The president of the council serves as an impartial individual in conducting meetings and all interfraternity matters.

Especially in this, the fortieth anniversary year of O.C.C., Footprints has proudly served the College and its increasingly active Alumni Association. As a student publication, it consistently attempts to solidify and expand the profession of chiropractic by organizing one of the profession's basic requirements. O.C.C. Footprints travels over the entire United States and to many foreign nations of the world. It brings to students, friends, and alumni news of the school, of other alumni, and the profession in general. Through this means, a current educational influence of the College is continued to the alumni after graduation. May Footprints always be honored to serve O.C.C. in the future as it has in the past.

The Board of Trustees of the Ohio College of Chiropody requests the honour of your presence at the Commencement Exercises for the Conferring of the Degree of Doctor of Surgical Chiropody Saturday morning, June the second nineteen hundred and fifty-six at eleven o'clock Severance Hall Cleveland, Ohio
Commencement
Senior Class History

As we come to the end of four years of detailed and specialized study the class of 1956 can look back upon many new experiences and at times, hardships, that we have shared together.

Upon arrival at O.C.C., we were confronted with many complicated subjects and a foreign language known as Medical Terminology. Upon conquering these hazards, we entered our Sophomore year and began dissection which was a new and somewhat difficult task for some members of the class. The Sophomore year also saw our class decrease somewhat due to the draft.

In May of 1954 we got our first glimpse of the practical side of Chiropody, as we entered the Clinic to observe the Junior and Senior students at work. After a month of observation, we began the task of taking care of patients. Under the guidance of Drs. Bliehall and Schwartzfeld, our two years of clinical work have been both pleasant and fruitful.

On May 8, the class held the annual Senior Dinner Dance at the Alcazar Hotel.

As we stand on the brink of our chiropodical careers, it is our sincere hope that we will become leaders in our profession and help elevate it to a more deserving place in the field of medicine. It is our good fortune to say that we received our foundation from the finest school in the field, the Ohio College of Chiropody.

RICHARD DUNLAP, Class Secretary

The time has come for the class of 1956 to say farewell to the Ohio College of Chiropody. We wish to extend our thanks to the Board of Trustees, the Administrative staff and the instructors who have skillfully guided us through our Chiropodical education.

We are now going out to put into practice the knowledge that we have acquired during the past four years.

To my fellow graduates I say, let us not forget that graduation is truly a commencement. So let us continue, throughout our professional career to study and keep abreast of the advances in Chiropody, so that our patients will always receive the benefit of modern Chiropodical treatment. The future of Chiropody depends to a great extent on us and the manner in which we conduct ourselves throughout our professional career.

May our college grow through the years beyond our recognition, and may we as alumni always remember our obligation to our Alma Mater.

H. DARREL DARBY, Senior Class President
Progress is advancement in both physical aspects and mental attitude. It is the mental attitude that concerns me as Senior Class Advisor. During the past four years I have had the privilege of watching you grow into mature professional men.

The attitude of your class has been most gratifying and is a credit to the profession of Chiropody. This conscientious, sincere attitude is the foundation of success in professional life. Thus, it must be guarded and cherished in order that you may receive the respect due you as a professional man.

The privilege of practicing your profession carries with it certain moral responsibilities which you have automatically assumed when you chose a life of service to the public. In fact, these obligations were outlined some 2300 years ago by a Greek physician through the famous Oath of Hippocrates. These early codes of conduct are today, as well as years ago, a valuable guide in formulating ethical conduct in your professional life.

Become affiliated with your local and national organizations, and be an ACTIVE member. This will help you to think clearly during the difficult days of your early practice life.

As my farewell to the Class of 1956, I wish to leave you with this message. It will be to your benefit that you acquaint yourselves with the tangible forces of life to become a success. Be humble, yet positive; be sincere and honest and give credence to the adage, “Do unto others as you would have them do unto you.”

I.F.C. President 3
Zaccharian Research Society 3,4
As we look back on our junior year at the Ohio College of Chiropody, we remember it as a year that was both educational and enjoyable. We were taught many modern concepts of therapy which we put to use in our work in the clinic.

It was a year that marked our entrance into the Clinic, where we could finally come in contact with patients. We were aided greatly in our work not only by the senior students, but also by the Interns and the Clinicians.

The highlight of the social year for the class was the annual Christmas party, which was held for some 40 students and guests.

The Junior Class would like to take this opportunity to wish the graduating Seniors the best of luck and happiness in any ventures they may undertake.
With this, our second year of professional chiropody education, we the class of 1958, have initiated our clinical application of heretofore didactic concepts. Enthusiasm for a working knowledge of chiropody has increased among us as we intensify our quest for the treatments and cures for modern civilization's foot ailments. Without exception, it is noted that our admiration and interest for our chosen profession has matured to the extent, where only now are we visualizing the broad expanse of the capabilities which will soon be at our disposal. With pride and anxious anticipation we look forward to our roll in the profession of chiropody.
As freshmen we have ascended the first of four difficult steps towards our goal. There are forty-five varying reasons why we are here but all have the singular idea of becoming a Chiropodist. We look forward to the day when we may take a participating part in the field of Chiropody. Because of the extensive untrodden aspects of our profession we are able to take a deeper pride as befits those embarking upon something new. In gratitude we look to our predecessors with admiration for the path they have formed. May we be endowed to take our places among the men of Chiropody and always strive to maintain and build with merit on the foundation set by those before us.

To the graduating class, we offer our felicitations and best wishes for a successful practice.

CARL BARNES, President
Boston Postgraduates

ALAN E. MURRAY LABS.

Present
THE SPACE SHOE
To Graduates of Chiropody

First presented to chiropody in 1935 as a scientific invention. Now presented to the world by a hundred thousand wearers.

"Murray shoes have been reported successful in relieving symptoms. Such shoes are particularly helpful in the treatment of combinations of deformities such as flat feet, hammer toes, bunions, callosities and plantar warts."

— Consumer Reports

ALAN E. MURRAY

"The Father of Scientific Shoemaking."

Dr. Benjamin Levy

SUMMER COURSE FOR DOCTORS, Aug. 24-29, 1956

Alan E. Murray and staff conduct a 48 hour lecture, demonstration and laboratory course in Space Techniques. Seminars by graduates discuss the place of Murray Shoe in actual medical practice, and report patient response, case histories, etc.

Shoes and Feet to Boot
By Alan E. Murray

A book that gives the history and philosophy of the Space Shoe.

"This book will be of interest to all chiropodists. It presents the author's views on the relation of the feet to footwear. Many practitioners are already familiar with the work of Mr. Murray who advocates having "shoes fitted with the same preciseness as a dental plate."

— The Journal of the N.A.C.

* * * *

"This book should be brought to the attention of podiatrists, because of its "different" presentation and certainly because it is being advertised to the layman who may well ask questions about it in the podiatry office."

— Podiatry Digest

Write for literature.

As manufacturers of RELIANCE equipment, we are proud to have served the Chiropody Profession for two generations. Experience gained from constant research along lines suggested by the nation's leading Chiropodists has enabled us to produce equipment which offers the practitioner those qualities which he will most value in his day-to-day practice.

Like any long-term investment, the purchase of professional equipment deserves careful thought. Comparison is the best yardstick. In a treatment chair, *ease of adjustment, patient comfort*, sturdy construction and eye appeal are all features which play a leading role in determining the effortlessness and efficiency with which your day's appointments can be handled. Compare, then ask your friends who own RELIANCE equipment. They are our best salesmen.

ANTIOCH SHOES
A PRODUCT OF ANTIOCH COLLEGE

Foot Specialists know the success of their practice depends to a very considerable extent upon the quality of the shoes which their patients wear. Badly designed shoes can rapidly undo all that many hours of skillful treatment can accomplish. At the same time, ugly health shoes usually do little good, for women will not wear them consistently.

ANTIOCH SHOES are shaped like the feet. They have no gadgets or devices in them to operate against treatment or correction which the foot specialist may prescribe. Antiochs are correct shoes, attractively styled. Write for a booklet.
