YEARBOOKDEDICATION

PHILIP P. SAGINOR
Ph.C., D.S.C., (Hon) F.A.C.A.

If there is a man who is dedicated to his fellow man we are sure that it is this man. Dr. Saginor has dedicated himself to teaching and helping us, as students of chiropody. We have never heard of, or could imagine finding someone who has said anything derogatory about him. Many times these men, few as they are, go unappreciated. We, as chiropody students have recognized the goodness, wisdom and sincere devotion of this man and wish to express our heartfelt, gracious thanks to a golden individual who has truly followed the teachings of all societies and religions—to help and better his fellow man.

It is with great pride, that, as editors of the 1962 yearbook, in behalf of the senior class, we dedicate our book to a man who has devoted so much of his time for the advancement of Podiatry. He has given of his time, effort and knowledge to the students of the O.C.C. He has spent a great deal of his time in making possible a trip for the senior class to the Upjohn Co. He has also arranged for informative lectures from many of the various drug houses as well as acquainting us with the products themselves.

To Dr. Saginor goes our thanks and appreciation from the senior class for a remarkable job which he has done both here at the school and for the advancement of our profession. We are honored to be able to make this dedication of our yearbook to a man whose future will be blessed with all the good things he so rightfully deserves.

In reviewing their educational problems at a recent meeting of parents of college students, Dr. Frederick L. Hovde, President of Indiana's Purdue University said:

"Education is primarily a self-energized and self-motivated process. In other words, all learning is self-education. No one can do another person's learning for him."

"All the teachers, classrooms, laboratories and libraries are but aids and stimulants to enable a student's learning to be done more quickly, more easily and more efficiently. Because this is true, no matter where the student goes for his collegiate education, he must still educate himself."

Dr. Hovde states well the truth and while he was directing his remarks, in the main, to the liberal arts and technical college level, the same philosophy applies to professional colleges.

It seems to be the accepted policy in messages of this nature to tell the graduating class that they are entering the field at a very crucial time. Each year is labeled "A Year of Decision." One wonders if this is always a truism. We have heard much of changing times and the atomic age—the Fabulous Fifties—and the Soaring Sixties. Regardless of the nomenclature, we know that the years ahead offer a definite and distinct challenge.

Your professional training has included the very best in both didactic and clinical areas. You also have had exposure to the art of practice with its many, many ramifications. The faculty and facilities are second to none and you can feel proud that you have had better formal training in both the science and art of your chosen field than any graduating class from a like institution.

The horizons of our profession are boundless—We have made tremendous strides, but the ultimate goals are still very far away. The responsibility of reaching these objectives rests entirely with you and the other men and women of your generation. We feel sure that when the test comes you will be able to meet the challenge of your age adequately. We feel, too, that you will fully recognize the fact that this milestone, climaxed by the conferring of your doctorate degree, represents the beginning of a new phase of your education.

We know you will agree with Dr. Hovde and see to it that the "self-education" of the future becomes even more extensive than the formal education of your immediate past.

The Chiropodist’s Oath

Upon my honor, I swear this oath:

I shall, above all, hold paramount the welfare of my patient, regardless of fee or favor. I shall neither prescribe nor administer any treatment or drug detrimental to his well being.

I shall offer to the best of my ability professional advice to all who ask, without regard for race, creed or station in life, recognizing the obligation of my profession to render public service.

I shall preserve the dignity and honor of my profession and aid my brother practitioner to the fullest extent of my abilities.

In all good faith, I shall support the properly constituted organizations of my profession. I shall abstain from doing harm to my fellow man, and shall oppose any devices and false pretensions which do injury to him and to my profession.

With this oath I accept the moral and legal responsibilities of the profession of Chiropody.

I hereby dedicate myself to serve humanity holding as my goal the relief of pain and suffering.

Before God and my fellow man, may I adhere to this oath in the practice of my art and do honor to this, my chosen profession.

Presented at the commencement of The Ohio College of Chiropody.
CLASS PRESIDENT’S MESSAGE

Perhaps the most significant aspect of our graduation is that it represents not the completion, but an interim point in the continuum of our professional education. This has been our formulative period, the time of preparation. Long years of clinical and didactic effort have provided us with a degree of discernment, the ability to absorb and retain, to evaluate and measure, to weigh the salient and the extraneous, and to learn. Now we leave the sequestered unity of our college. The cohesive influence of our classroom bonds are loosened, and the range of our quest for knowledge immeasurably broadened.

Now we begin the most challenging phase of our education—to perpetuate it. Firmly grounded in training and experience, we are charged with the manifest responsibility of maintaining and advancing the knowledge we have thus far gained.

We are acutely aware of the obligations we assume. To be entrusted with the care of that most sacred of vessels, the human organism, is an honor and a privilege—a burden of enormous consequence, a labor, and an infinite responsibility.

Now we leave our college, we young men of learning and dedication—we leave in humility and with a humble spirit, and we dedicate ourselves to learn.

19. "Pssay, you guyyss... would you like to feel my muscless?"
20. "I can't wait 'til the greens thaw out!"
Senior Events

Class of '62 History

As we look back, it seems like yesterday when 26 new, green freshmen looking like tourists gazing at the Empire State Building entered the halls of O.C.C. We were a class of 26 strong. Yes, we even had a girl.

The officers were set up and screaming and complaining began. It took us awhile to realize things weren't so bad after all. As the year progressed our class dwindled under the strain to 22 students (minus one girl). Yes, the going was rough for "Youse guys."

As our summer vacation ended a few of the fellows returned with permanent female roommates. Everyone was looking back on the new freshman class and forward to the clinic. Many things had to be straightened out; tunics, cards, instruments and more complaints.

May rolled around quickly with the feared Dr. Fletcher pacing the halls. The boys sweated out their first patients and realized there was a lot of learning yet to go. The full realization of the punishment for those days when classes were overslept and cars failed was brought to the fore. This was the year when the point requirements were doubled and the boys really had to hustle.

The junior year was seen to start after "The Long Hot Summer" in the clinic. As the year progressed we then thought we were as smart as the seniors and the clinicians. This was also the year the class saw a slight change by losing 3 students and turning around by gaining 3 new ones. This was a rough year for the O.C.C. juniors with many tough subjects along with the scrambling for points in the clinic. Although these hurdles were high, the class came out intact. At this point, we were smarter than any living human.

The class was split up into quarters for summer clinic coverage (remember fellows??). Some of the fellows traveled near and far in hopes of finding an office location. One of the fellows went as far as San Juan but came back with only a suntan to show for it.

The senior year began and by this time 5/7 of the class was married. Some of the wives were gaining weight beyond belief with the cigar market booming. The poor stork was so busy we thought it would have a coronary. By this time the Domenico's, Gallina's, Eckles', Pilla's, Rappaport's, Reznick's, Schwartzfeld's and Weinstein's had additions to their families.

Now that we are near the end of actual schooling (far from the end of our learning) the road is all uphill but hasn't lacked the time for a rest here and there. It was enjoyable without a doubt. I'm sure we will never forget these years and will always look back on the good and bad with pleasure.

Gerson Perry
Secretary

Some of the Choice sayings were:
"Youse guys."
"He does it in every class, Dr."
"Mark 'em absent."
"Have a nice holiday" or "See you next week."
SENIOR EVENTS
Secretary's Notes of 1982 Reunion

Dick Albright has established a podiatric first! He's been appointed Chief of the Podiatry Department at Bellevue State Hospital — the only inmate so privileged.

Bernie Freed has co-authored a new medical dictionary with Noah Webster; and is well known for his designing of a new type room for podiatry offices — The Gavel Room.

Errol Schoenbrun has been appointed chief public relations man for the American Podiatry Association.

Jerry Gallina is still explaining to his wife about the 1960 A. G. K. rush affair. He keeps “telling” her it was all innocent fun.

Tony Domenico still refuses to wear a hearing-aid and keeps insisting that Dr. Suppan DID tell him that he had “surgeon’s hands”.

Murray Davidson still maintains he can lick any man in the house and is proud to have been chosen for the role of Dr. Zorba in the Ben Casey series.

Pat Pilla has been honored as the first podiatrist to practice in Vatican City and is quite busy teaching English to his countrymen.

Al Schwartzenfeld is the director of student activities at O.C.C. and is Dean Hascal’s right hand man.

Howard Reznick has a very successful practice in Pennsylvania and has become very active in the Alumni Association. He dislikes the cold weather in Michigan and isn't too interested in surgery — (doesn't sound kosher to me).

Syl Miller has been voted Mr. Y.M.C.A. of 1982 and has his own cab company. In addition, I understand he has the largest practice in Dallas, Texas — he treats over 500 steers a week!

Barry Kaplan is still trying to collect dues from certain men. Rumor has it that he’s part owner of the Golden Nugget in Las Vegas.

Leonard Hascal has become Dean of O.C.C. (as expected) and has received the Wynlit Drug Co. scholarship for the twentieth consecutive year.

Roy Potter — Z Z Z Z z z z. Roy didn’t make the reunion!

Mark Rappaport has written a book (now under investigation by a Congressional subcommittee) dubiously entitled “Professional Confidence Games”.

Charles Hoffman has been honored by the O.C.C. Alumni Association for his outstanding support, both financial and moral, to the school.

Dave Ritchie recently purchased a cigar factory and is smoking up all the profits. He was just lately voted “Best Dressed Man of the Year” by National Geographic Magazine.

Frank Eckles is trying to get his “gear strap” approved and presented to the Rockefeller Institute. He looked rather different in his monocle, shiny black boots, and whip (not to mention that armband).

Al Wienstein is the newest associate of Levy, Rapel & Wienstein. He was recently elected by the students of O.C.C. as Advisor to the I.F.C.

Bob Gosselin still plays golf, lifts weights, and never has a hair out of place (does he or doesn’t he use Brylcream?) I hear that he and Tony Domenico are on the Board of Trustees for Playboy Inc.

Gerson Perry is considered “The Most Outstanding Podiatrist in America” by Mad Magazine due to his resemblance to Alfred E. Nueman.

Jerry Falke does all the medical illustrations for the Clinical Symposiums and is making lampshades and bongo drum covers from a new type of leather — he calls it UMANN!

Mike Kates has furthered his education and is now practicing his new specialty of Proctology with his father who is a Urologist. Between the two of them, they get the patients coming and going!

JUNIORS

1962
Now in our third year of Chiropody training, we face those challenging years of which President Kennedy has spoken. With the event of national boards being established this year through the never tiring efforts of Dr. L. A. Hansen, the field of Chiropody has taken a step forward. I am glad that the junior class along with the graduating seniors, will represent the Ohio College of Chiropody in taking this national board.

We wish to acknowledge the efforts of Dr. Pomerantz, Dr. Egerter, and Dr. Fletcher in the past three years, as to their interest and consideration in regards to the plight of the student. The dedication of these three men may be considered as most refreshing in its extent.

Due to the cooperation of the other members of my staff and the excellent contributions of individual members of the class, much outside knowledge has been given to benefit our education. With this kind of effort, it is my contention that this year of schooling has been successful for the entire class.

In closing, the Class of "63" expresses good fortune to the senior class in all their endeavors.

The Loss Of A Friend

Death cuts in on life’s sweet dance,
And doesn’t think of age,
It steals a friendship from my side,
And writes a sorrowful page.

I feel the loss so much I weep,
I can’t forget my grief,
A young friend who had life to live,
But it was very brief.

He sleeps while I go on and live,
The life God set for me,
It was God’s will he go this way,
But this I cannot see.

I should feel that this young man,
Who lived God’s life and died,
Is happy now for reasons clear,
He does with God abide.

By Janice Davidson
1962

SOPHOMORES
As the year draws to a close, one-half of our academic career in Podiatry will be completed. The unknown classmate is now a friend. The unknown challenge of academic demands has been met and conquered. Now, at the mid-point of our years at the college we can reevaluate our training, our progress, and our enthusiasm for our profession. Someone once said that an expert was a man who knew just that much more about his subject than his associates. Let us realize how easy it is and resolve how necessary to learn that fraction more in the next two years in order to prepare adequately for our profession.

We would like to extend our appreciation and gratitude to the members of the faculty who not only have guided us academically, but also have taken a warm personal interest in our problems.

My own personal thanks to my fellow class officers and the executive committee for their help and support which have been so generously given.

Finally, we of the sophomore class extend our very best wishes for success and happiness to each member of the graduating class.

George Peterson

1962
FRESHMEN
As our first year draws to a close we regress through the short months to that day in September when forty-nine of us converged upon this college to begin a career in Chiropody. We were forty-nine strangers representing thirteen states, and a variety of educational and professional backgrounds, and guided to this field by assorted reasons. Our interest in Chiropody was indeed, our only apparent common quality. The months to follow were ones of adjustment — adjustment to the college, the faculty, and our fellow students.

As the prologue of our chosen profession began to unfold most of us were reaffirmed in our decision to join this profession and to choose this institution in which to prepare ourselves for that profession. We were encouraged by the seemingly limitless opportunities that exist for the ambitious and dedicated practitioner and also, duly impressed by the great strides that this profession has taken in the past decade. It is such advancement at the hands of ethical and skilled practitioners that has created those opportunities which we shall enjoy.

Within the next ten years we will be practicing members of the profession and we shall have an active part in maintaining, matching, or surpassing the progression of the last ten years. With that responsibility already conferred upon us, we are morally impelled to prepare ourselves through the next three years as able and ethical practitioners of a healing art which is now finding its position and exerting its undeniable importance in the field of medicine.

To the graduating doctors we extend congratulations and sincere best wishes for a happy, active, and productive practice.

CLINICIANS
"An investment in knowledge", said Benjamin Franklin, "always pays the best dividends." The eight interns pictured on this page, two of which placed first and second scholastically in their class, must surely share this view. These young doctors, and others like them, who have been adequately prepared by training and experience make evident the fact that the one to do foot surgery is the Podiatrist precisely because his practice is limited to the foot.

As Podiatry's evolution unfolds, there is a greater need on the part of the students to learn and give a more comprehensive service to their patients. In this, my seventh year of the Intern Training Program I have become aware of the transition that has taken place. The Intern Program formerly attracted those who needed an additional year in order to practice in their respective states. This situation is now more the exception than the rule, perhaps because in the words of Henri Poincare"The scientist does not study nature because it is useful alone but because he delights in it and he delights in it because it is beautiful."

R. J. Suppan, D.S.C.
Director of Interns
The Chiropody department has played an active part on the Cleveland State Hospital staff, for over a period of ten years. It was founded through the co-operation of the Superintendent of the hospital, and the efforts of the Ohio College of Chiropody.

Its supervision is under the direction of graduate Chiropodists, Drs. John N. Kane, James C. MacVeigh, and Carl Sosinski.

All the facilities of a modern hospital are at the disposal of the department, which enables the staff to offer a more adequate and comprehensive teaching program. During the students' tour of duty ample opportunities are offered for the participation in hospital protocol, surgical observation, and all functions.

This program enables the student to increase his perspective, appreciate Chiropody as a unit of the Medical Department, and understand some of the therapeutics and rehabilitation of patients, both from the physical and psychiatric standpoints.
The Inter Fraternity Council is the governing organization of the fraternity system. It is the representative body of the three fraternities at the Ohio College of Chiropody, Alpha Gamma Kappa, Kappa Tau Epsilon, and Phi Alpha Pi.

Our purpose is to unite the fraternities, stimulate fraternalism, coordinate all fraternity functions, and to serve the best interests of the fraternity system through discussion and co-operative attack on common problems. It is our job to make decisions pertaining to rushing and act as a judicial board on all fraternity subjects.

The council is composed of five members from each fraternity. There are three delegates and two alternates, the president of each fraternity being an automatic member of the I.F.C. The office of the presidency rotates each year as do the other offices.

During this past year, the I.F.C. sponsored a stag at Mirenda’s Pizzaria and a Christmas Party at the Tasty Shop. Both affairs were big successes and helped the I.F.C. to enjoy an eventful year.

Fraternally,
Allan Schwartzenfeld
President of the Inter Fraternity Council
As President of K.T.E., bringing the Senior year to a close, prompts one to reflect ahead with concern for the near future. In no other profession is progress, research, unity of thought and purpose, the key to modern medical procedure and discovery.

Yes, we are on the threshold of new developments in both basic and surgical podiatry. However, in order to make these developments, and our profession eternal in the area of modern medicine, we must have a concise unity of purpose and a method for the accomplishment of its goals. In this light, I am proud to say that K.T.E. has and always will dedicate itself to progress through its scientific lectures, practical demonstrations, public relations and charitable endeavors. Our purpose is not only to promote unity in podiatry, but also in relation to our allied professions. For here is where the basis of unity, thought, deed, and progress are to be maintained with dignity, and an open mind directed toward the honor of podiatry and its responsibility to humanity. Just as the surgical team functions best as a unified organization, so must we organize our future aims toward the properly constituted organization of our profession. Therefore, not only must we receive, but it is incumbent upon us to give of ourselves. All too often we think of what we can withdraw, without realizing that there must be a deposit before we can draw on it. Essentially this investment by K.T.E. is our dignified fraternal comradeship with those who are dedicated to further and honor podiatry. It is in this way that at the time of graduation the importance of a unity of purpose becomes more vivid and dependent upon medical cooperation and the obligation of our profession to serve humanity to the fullest extent of our abilities. This can only be achieved if we pay heed to the theory that "UNITED WE STAND, DIVIDED WE FALL". Thus it is to the graduating seniors of K.T.E. that I place the foundation of united leadership for the future progress of modern podiatry.

Dave Ritchie
President.
HISTORY OF KAPPA TAU EPSILON

Kappa Tau Epsilon, the youngest national podiatry fraternity, was founded at the Ohio College of Chiropody on March 8, 1932. At first it was known as the Chiropody Club but later that year received its charter from the college as the Kappa Tau Epsilon Fraternity. The fraternity was organized and fostered by a group of men whose aim was then, just as it is now, to advance the profession of podiatry “by means of scientific investigation and discussion.” This principle, maintained through the years by the members of K.T.E., has made this group the outstanding professional fraternity it is today.

On May 6, 1935, Kappa Tau Epsilon became a chapter of Beta Tau Alpha Fraternity. The financial strain of the depression era was too great for this newly formed national group and it was forced to dissolve by the end of 1938. The fraternity was then reorganized as Kappa Tau Epsilon with the Ohio group known as the Alpha Chapter. It, too, suffered financially and only the Alpha Chapter survived. The Illinois group reorganized as Zeta Delta Zeta Fraternity and remained independent.

A delegation from K.T.E. visited Chicago as the guests of Zeta Delta Zeta on February 19, 1961. At this time it was decided to renew the bonds of brotherhood both groups had once enjoyed, with Z.D.Z. becoming the Beta Chapter of Kappa Tau Epsilon.

This is the first step in the extension of the aims and ideals shared alike by the Alpha and Beta Chapters of Kappa Tau Epsilon. The fraternity expects to establish chapters at the other colleges of podiatry and thus further the scope of its membership and do credit to the profession.
The Epsilon chapter of Phi Alpha Pi has certainly been an inspiration to me, as I'm sure it has been to its other members. Phi has made it possible for us to attain a great deal of educational and scientific knowledge, the pursuit of which is the basis of our fraternity's intentions.

Our many scientific lectures, by some of the profession's most outstanding men, have benefited us as well as the entire student body. Through our home demonstrations, we have been able to take part in clinical procedures which have made us more adept to cope with some of the profession's new concepts.

To all of the members of the fraternity I would like to express my sincere thanks for helping to make this a successful year. I know that you will continue to carry on the fine tradition of Phi Alpha Pi in the years to come.

To Phi's graduating seniors I would like to wish the very best of luck and success in their Podiatric careers.

Sylvon J. Miller,
President.
HiStory of Phi Alpha Pi

Phi Alpha Pi, the oldest of all the national chiropody fraternities, was founded forty-one years ago in 1919 by a group of students at the Illinois College of Chiropody.

The fraternity was organized for the purposes of furthering scientific knowledge. Social life also was an integral part of its activities.

Within three years, the fraternity expanded to national scope under the proposal of Dr. William Stickel. The next two years saw Phi's national membership grow to more than six hundred men.

Epsilon chapter of Phi Alpha Pi was formed when a local fraternal organization of the Ohio College of Chiropody yielded its chapter. Continuing its rapid growth, the fraternity added chapters at various chiropody schools throughout the country. After World War II, the rate of growth made necessary reorganization at the national level.

National conventions have been held annually since 1948. They are the highlight of the year on the national agenda. Locally, Phi's scientific and educational programs have established a standard for the profession's fraternities.

In keeping with the noblest American traditions, Phi Alpha Pi makes no distinction with reference to race, creed, or color when choosing its membership. Presently, Phi is represented in all states of the Union and in Canada. The Phi alumni number among the leaders of our profession and their names are known to all who have any association with Chiropody.
A fraternity, regardless of its alphabetical designation, is an organization of men collectively dedicated to one major proposition — brotherhood. Individual fraternities may have their various blandishments to attract men, whom, by their individual standards are considered “quality”. Since fraternities are scholastic organizations is “brotherhood” to cease on graduation day? Emphatically NO!

To be an analogous, we graduates, who are venturing out to establish ourselves, have chosen Podiatry as a fraternity; hence it is our responsibility to assure that men who are future “pledges” to Podiatry are men of “quality” and that we support our chosen profession both scientifically and financially so that our “fraternity” will flourish by cooperative effort. This entails such details as joining local, state and national representative societies and above all being active in these said organizations.

Fraternity pins and mugs are external signs of the undergraduate fraternities. We, as graduates, are wearing a more profound mark, that of “Doctor”. This title is the manifestation of several years of academic endeavor, but does not end with graduation. It is the responsibility of every practitioner to remain abreast of current advances that we may do justice by our patients. By upholding these responsibilities we will contribute to our “fraternity” by maintaining its “quality” and propagate its “brotherhood”.

Robert Gosselin,
President
The Alpha Gamma Kappa Fraternity was founded in the year 1921 at the Illinois College of Chiropody. There were eighteen charter members, the leader of which was Dr. Zurlindn of Erie, Pennsylvania and Dr. Clifford Grigg, then dean of the college. The fraternity was constituted and chartered by the State of Illinois for the purpose of elevating the standards of Chiropody; promoting good fellowship among students, future students and graduate members of the profession; and to constitute other chapters in other Chiropody Colleges for the same purpose.

The Kappa Chapter was organized at the Ohio College of Chiropody on November 25, 1927, by Dr. Chitwood, and Dr. Dye, and initiated sixteen charter members. Dr. Harmolin was the first honorary member.

Its purposes being: promotion of friendship, development of character, assistance in the gaining of a sound education, and the observance of the highest standard of ethics so that the Profession of Chiropody may be advanced through the efforts of the fraternity.
ACTIVITIES

1962
The birds' weapon in nature is flight. Man's weapon in nature is the development of his cerebral hemispheres, his brain. This is a basic genetic inheritance—to think. Learning is the missile, and positive application is the success of our instrument.

Not long ago I met a young man who worked and attended night school. His parents had died and he had been on his own since he was sixteen years old, surely not a unique circumstance. He told me when he managed to save money he would go to college. In bits and splashes he has earned three years toward a degree. It did not matter to him how long it would take to receive the degree; he only spoke of getting it. This is his simple formula for success. Granted it is not the complete formula. He and most other people of the 60's realize that education is the cornerstone of success.

The dictionary defines education as the systematic development and cultivation of the natural powers; instruction and training in an institution, the result of such instruction and training.

Our true, full education begins at birth and ends at death, even though our "formal" education may terminate with high school or college. There is a basic desire to learn. Through various other means (television, radio, newspapers, magazines) we become educated as we are constantly susceptible to gaining new knowledge.

But to those of us who concentrate our interests on one field and gain untold knowledge in that field, there is reward. This reward may come in many forms, for to help others through knowledge we have gained, means to help ourselves.

We, as seniors have acquired a degree in Podiatry, a proven, necessary profession. Good luck fellow students, display positiveness and you will succeed. There is no alternative!

Co-Editor

Murray Davidson
Scholarship, research, and public education! These are the three fundamental principles that the Zaccharian Research Society has been based on in the years since its establishment in our college.

Through our membership in Zaccharian, we have expressed our desire to partake in the development of these factors for the enrichment of ourselves and especially the advancement of our profession.

In Zaccharian Research Society we have learned as students that sharing the ideas of research, and public education programs can go a long way in helping to advance our profession to the point where it will be equal with the other healing arts. It is not enough that we realize this as students. We must upon graduation from our school continuously work with the tools of scholarship, research, and public education that have been handed to us through membership in our society and with them do our share of the work necessary in strengthening our profession through active membership in our state and national organizations. As a Zaccharianite this is our obligation both to the society we represent and above all to our profession.

Gerald T. Gallina
President.
The events remaining for the Student Council activities are the Golf Tournament, Theater Party and the Chess and Ping Pong tournaments. Keep up the good attendance.

It is the Student Council's hope, that by the time the fall term begins, a Co-Op Book Store will be a reality. It is our aim to supply the student body with books, instruments, materials and uniforms at a discount comparable to other colleges.

The Co-Op store will be located in our school and will be managed by your Student Council. The newly elected men must be chosen wisely, for they must be able to assume responsibility for this new endeavor, along with the usual activities.

In closing, I want to thank the officers and representatives for their cooperation and support.

Good Luck

Anthony Domenico
Women’s Board at The Ohio College of Chiropody is an organization which provides the wives of the students an opportunity to become acquainted with each other and to learn more about the profession of Podiatry. We strive to gain a greater knowledge of Podiatry and to help in its advancement. As wives of future practitioners we can help the profession greatly by knowing and understanding the role of the Podiatrist in the community, by showing an interest in the profession, and by being able to speak intelligently and informatively about Podiatry.

The activities of our group are many, including: lectures, philanthropic and fund raising projects, and social events. Our main fund raising project for the year was promoting Caduceus jewelry. Through the funds acquired, we purchased a gift for the clinic and also donated money to the Samuel Michael Memorial Film Fund library.

Women’s Board joined with the North Eastern Ohio Women’s Auxiliary Board in donating money to purchase front doors for the school and to aid the school in its project of beautifying the University Circle Area. Our philanthropic projects included giving two baskets of food to needy families at Thanksgiving. We also gave a valentine party for nursery school children.

I would like to take this opportunity to thank all the members, committee chairmen, and especially the officers for their time, support, and willingness to work. The officers were Adria Aronovitz, Vice-President; Marilyn Touchton, Recording Secretary; Margaret Ybanez, Corresponding Secretary, and Harriet Gruber, Treasurer. A special thanks goes to Rochelle Lederman and Billie Stevens for their extra time and effort on promoting the Caduceus jewelry.

Women’s Board extends congratulations to the graduating seniors and their families.

Sincerely,
Ann Cox
President
And we thought it would be a hard job! When it comes right down to it the only real trouble we had was keeping the coffee stains off the pictures. And along the same vein, many thanks to Wade's Drug Store for allowing us to use their tables as our office. May we thank all those wonderful people who helped us with the yearbook. We are sorry that all of the wonderful articles we received could not be printed; time and money just wouldn't allow it. We were truly shocked at the willingness all showed in getting the material to us on time. It seemed as if most of the contributors had been ready in September. I suppose that professional school promotes this type of responsibility in individuals.

We, as the Co-Editors would like to extend our true thanks to Irv Donick and Tom Stevens and their staff for doing such a wonderful job in procuring the advertisements.

It's been a wonderful experience working on the Occopodian; we hope you all enjoy reading it over as much as we enjoyed putting this annual together.

Sincerely,
Co-Editors
Dave Ritchie and Murray Davidson
Paramount among the tenets of our profession is the relationship existent between student and doctor. This standard of mutual concern, and respect, has become one of the hallmarks of the medical professions. It is the link that binds teacher to student, each in his turn, a continuing chain of fraternal devotion.

This periodical serves as one of the media of exchange by which such a tradition is strengthened and maintained. Through it we, as students, are able to communicate with our seniors in Podiatry. Through it too, those who have completed the road which we now travel can maintain proximity to their college.

The staff of Footprints, a student publication of the Ohio College of Chiropody, offers its most sincere congratulations to the graduating class of 1962. We pledge to you, who are to become alumni, a continuing dedication to the ideals of this college and of this profession.

James B. Freed

The 1962 graduating class of O.C.C. was once again privileged to be guests of the Upjohn Pharmaceutical Co. in Kalamazoo, Michigan.

During the visit, the fine research facilities, as well as the huge production plant were toured. Food was in great abundance and of the best quality.

All who went will attest to the fact that much knowledge was gained through the visit and an improved relationship between the professions was achieved.

The company representatives were quite enthused with our group and once again have set aside dates for future classes of the Ohio College of Chiropody and have extended invitations to any members of the profession to make a similar trip.

Faculty members accompanied the senior class and found the trip to be very valuable.

originator of foot balance inlays is directed
in all its endeavors to accomplish this result

Antioch Shoes
A Product of Antioch College
NO FOOT SHOULD HAVE TO FIT A SHOE
ANTIOCHS ARE MADE TO FIT THE FOOT
When you wear Antioch Shoes, properly fitted, you benefit directly from the years of careful study at Antioch College where they were created. Professional men and women, artists, designers and manufacturers pooled the results of their study and experience to make these Shoes of Happiness. Comfort is our business. May we serve you?

A POSITIVE STEP in the direction of more patients and professional dignity is yours, with the adoption of ethical dispensing.

A PATIENT EDUCATION PAMPHLET, coupled with a prescription, puts the emphasis on the treatment of the doctor and not on the prescription.

The careful packaging and ethical appearance of Chiropody Prescriptions reflects favorably what you stand for. The prescriptions emphasize the dignity and importance of your treatment and service.
