Memories ...
CONTINUING EDUCATION

Ester Goldblatt
Director, Continuing Education

Nancy Rozell
Continuing Education Secretary
The Office of Clinical Development supports the mission of the college through its Community Service Programs, seeking an increased patient volume resulting in new and improved clinical experiences for its student body.

Dr. Richard H. Lanham, former APMA President defines service in the following manner:
S  Service
E  Excellence
R  Role Modeling
V  Value
I  Integrity
C  Communication
E  Enthusiasm
This year OCPM students participated in many community events. Especially successful was the March of Dimes Walkathon '87.

We the class of '87 honor Dr. Jim Lichniak as Clinician of Excellence.
You have played a role in preparing us for our professional future. You took an interest in presenting pertinent information needed, explaining the methods and rationale that we need to succeed. Thank you for your support!

Class of '87

PROFESSOR OF EXCELLENCE

Dr. Sedmak — Photo unavailable
Remembering the Orthotics Lab ...
Research at OCPM

L. L. GLENN, Ph.D.
NEUROBIOLOGY

Brad Samojla D.P.M.
Research is an important element among the contributions that a podiatric medical college makes to the podiatric profession, being subordinate only to medical training and patient care. The number of podiatric biomedical research investigations has been steadily increasing at OCPM over the past ten years. Of all podiatric colleges, none conducts more research than ours. This research may take place quietly, in the backs of laboratories and behind closed doors in the clinic, but it steadily progresses. For example, it is not widely known within the college that several biomedical breakthroughs have been made at OCPM in the past three years in the Locomotion Research Laboratory. It is, however, known outside of the college, and this contributes very importantly to the regard of our institution by other podiatrists, physicians, scientists, universities, and the government.
There can be little doubt that without the Alumni Association much of what goes on at OCPM just would not occur.

The Alumni Bookstore offers students the opportunity to purchase texts conventiently!

As you see on the next page this year the Alumni Association helped the students one more time with the addition of a gym on the 6th floor.
ALUMNI Assoc. FLEXES MUSCLE
WITH OCPM’S NEW Health Center
Here, Donna is displaying the vast number of medical publications the OCPM library carries! Seeing all those journals makes students smile!
A new addition to OCPM is the MEDIA CENTER.

During our 4 years here  
We've grown in many ways  
From the nervous & wary strangers on the first day —  
To the hysterical study partners the night before an exam  
To the treasured friends we've become.  
And during this time  
We've laughed a lot and we've cried a lot  
We've worried together and smiled together  
But now our stay here is over  
And its time to move on.  
We have been challenged  
And now the challenge will come from the  
Needs of people, our people  
Do not fail them.  
The path ahead is ours  
To make a mark, to find a dream  
But which ever way it leads us  
We'll always have these memories  
to take along.

Michael J. Szalach

1954 - 1987

Even though we may be apart
You will always be with us
Constantly being a source of strength and inspiration.

School, the place where dreams became reality
A career choice made by himself — for himself
Lasting friendships created — back of the room celebrations
— endless editorial comments
— pre-exam tutorials . . . Thank God!

Wally Wiseman
1954 — 1987

A person who was not envious and loved others
— a rare person
Free to do what he wanted
Lived the way he chose
Looked the way he liked
Said what he felt and all accepted this
Looked at the brighter side of life
Cast out gloom and despair
And when anyone needed a helping hand
Wally was always there.

Wally and Jo
More than a meeting and joining of hearts — a union of two souls.

The high incidence of MALPRACTICE demands that all excised tissue be examined.

Our laboratory, exclusively serving the Podiatry profession, offers:

- Pathology Reports 48-72 hrs
- Pre-paid Biopsy Mailers Sent upon request
- Difficult Case Consultations With a member of your profession
- Statistical Data From our computerized pathology bank
- Sponsoring Foot Pathology Seminars

KERAGEN™ IMPLANT
Package Insert Summary

INDICATIONS AND USAGE:
Keragen Implant is indicated for subdermal augmentation beneath keratotic lesions of the foot. The etiology of the defect, tissue stress at the implant site, and the plane of placement of the implant will affect the degree and duration of soft tissue restoration.

CONTRAINDICATIONS:
Therapy should not be initiated if the patient has:
1. an untoward response to the required Collagen Test Implant;
2. a personal history of autoimmune disease;
3. a history of anaphylactoid reactions;
4. a known hypersensitivity to lidocaine or to injectable collagens;
5. diabetes or clinical evidence of peripheral vascular disease.

Keragen Implant is not indicated for use in breast augmentation, or for implantation into bone, tendon, ligament, or muscle.

WARNINGS:
A Collagen Test Implant must be administered and evaluated prior to treatment using Keragen Implant.

Note: The Collagen Test Implant is non-cross-linked collagen, while Keragen Implant is cross-linked collagen. Placement of Keragen Implant into dermal vessels may cause vascular occlusion, infarction, or embolic phenomena.

PRECAUTIONS:
Use is cautioned in patients with atopic or allergic reactions to other substances. Transcutaneous procedures have an inherent risk of infection. Use in sites of active inflammatory process or infection should be avoided. In clinical evaluation of Keragen Implant, data beyond six months follow-up is limited; therefore, the effectiveness of the implant beyond that time period is not established. The safety of the material has not been established in pregnant women or in individuals under 18 years of age.

TREATMENT REACTIONS:
Among patients receiving injections of Collagen Implant for cosmetic soft tissue restoration, transient or minimal swelling, mild redness, and discomfort generally occur immediately following implantation. Less than 1% of patients report moderate induration, edema, mild pruritus, usually associated with episodes of peripheral vasodilatation. Bruising or discoloration has been observed with spontaneous resolution.

ADVERSE REACTIONS:
Sensitization reactions to injectable Collagen Implants have occurred in fewer than 1.3% of treated patients. Most reaction have been of an immune nature and have occurred following an unrecognized or unreported positive test. Systemic complaints have been reported by fewer than 0.03% of patients treated with Collagen Implants; these complaints have consisted of nausea, rash, arthralgia, myalgia and headache. An anaphylactoid response has occurred and included an acute episode of hypotension and difficulty in breathing. Following treatment with Keragen Implant, pain lasting in most cases less than 72 hours has been associated with extensive walking or standing immediately after injection. In a small number of cases, necrosis at the lesion site has been reported following implantation in superficial tissue planes; resolution has occurred without sequelae. Local hypersensitivity responses to Keragen implantations have been reported in fewer than 1% of patients treated.

See Keragen Implant Physician Package Insert for complete information concerning indications, contraindications, warnings, precautions, adverse reactions and directions for use.

Economy with High Quality

PJ-Series
We told our engineers: "Give us an economical series of podiatry chairs and tables, but don’t sacrifice comfort, efficiency or durability."
They gave us the PJ-Series — three chairs and tables that differ from our higher priced J-Series in only one respect: instead of full-power medical lift bases, the PJ-Series offers rugged steel fixed pedestal bases. Virtually everything else is the same, including the heavy-duty steel frame; the tastefully upholstered removable cushions; the top grade, fire-retardant Naugahyde®; and the versatile, easy patient positioning with either the standard tri-power or dual foot controls, or optional hand-operated switches.
And if you should ever want to add a full-power medical base, we’ve wired and engineered the upper structure to allow you to do so without any modification.
PDM’s PJ-Series — chairs and tables that can grow with your practice.

For more information contact your PDM dealer or call us toll-free at 1.800.453.8474
A New Solution to An Age-Old Problem

Collagen Corporation has developed a new solution to the age-old problem of treating keratotic lesions—Keragen™ Implant.

Injected subdermally at the site of painful lesions, Keragen™ Implant is a robust cross-linked collagen gel which forms a protective cushion between skin and bone.

Keragen™ Implant is safe, efficacious and convenient to use. It is especially ideal for those patients for whom surgery is not appropriate or desired and for those who want a treatment alternative to routine care.

Keragen™ Implant... a new and innovative solution to an age-old problem.

For further information please call or write.

SERVING THE PODIATRIST AND THEIR PATIENTS
CONGRATULATIONS CLASS OF 1986
Injections in the foot can be extremely painful and difficult. Controlling the pain of injection with Gebauer Fluro Ethyl makes it easier for you to treat your patients effectively and efficiently.

Fluro Ethyl is ideal for pre-injection applications, because its controlled spray desensitizes the entire affected area quickly and safely. It is also excellent for minor surgery, because it anesthetizes without the excessive skin cooling that can permanently damage tissues.

In addition, Fluro Ethyl is effective in treating the pain and swelling of sports related (and other) contusions. Fluro Ethyl is a non-invasive, non-flammable topical anesthetic and skin refrigerant, formulated to be effective and reliable from the first use to the last.

Gebauer Fluro Ethyl is available in a convenient 9-ounce aerosol can for fast, safe control of pain associated with podiatric procedures. It belongs in every podiatry practice.

Gebauer Fluro Ethyl. Consider it part of the equipment. For more information about Gebauer Fluro Ethyl applications and the distributor nearest you, write the Gebauer Chemical Company, 9410 St. Catherine Avenue, Cleveland, Ohio 44114, or call toll-free (800) 321-9348. In Ohio, call collect (216) 271-5252.
THE THRILL OF MAKING IT.

You're now a fellow researcher, a fellow clinician, a fellow explorer into the biomechanics of human gait. Your new role as a professional inspires us all. Because out of new, passionately-held ideas, innovation is born. That alone is reason to celebrate.

A MUTUAL COMPANY
Keeping Quality Up and Prices Down

We've all felt the squeeze of runaway prices and the shrinking dollar. The problem is especially crucial for the Podiatrist. He has to provide thoroughly professional services and the highest quality orthotic appliances.

Unlike many non-medical fields, there is no room for compromise. Quality healthcare must be maintained. In the face of rising costs, the Podiatrist is hard-pressed to charge the fees to which he is entitled.

There is a solution to the problem. For over 65 years, Saperston Laboratories has provided the podiatric profession with a full range of top quality orthotic services—everything from a simple basic correction, to the most complicated specific pros-

thetic. At the same time, Saperston has diligently maintained stable prices.

We are proud of the fact that we have been able to hold the line on prices by adhering to rigorous cost efficiency. Saperston orthotics will continue to be of the finest quality at the fairest prices.

STOP CAST ITCH
with the REECE Orthopedic Shoe

The Reece Orthopedic Shoe ends the constant scratching problem of foot casts. The Reece Shoe offers many of the advantages of cast protection... with more freedom and less discomfort. You and your patients will find the Reece Orthopedic Shoe far more satisfactory than a cast for many broken or crushed foot bones and dislocations. It provides better post-operative care for most cases of foot surgery and aids in the treatment of burns, sprains, athlete's foot and bursitis. The Reece Shoe is far easier to administer than a cumbersome cast... and more readily accepted by patients.

So, stop scratching. Use the Reece Orthopedic Shoe for superior comfort, mobility, and ventilation.

For more information and sample shoe, ask your equipment dealer or write to:
